6. Statement on comparison of information in the combined financial statements

The corresponding figures in the previous year can be compared with those in the current year

II. FISCAL YEAR AND STANDARD CURRENCY UNIT USED IN ACCOUNTING

1. Fiscal year

The fiscal year of the Company is from 1 January to 31 December annually

2. Accounting currency

The standard currency unit used in accounting is Vietnam Dong (VND) as most of transactions are primarily made in VND.

III. ACCOUNTING STANDARDS AND SYSTEM APPLIED

1. Accounting system

The Company has applied the Vietnamese Accounting Standards and System issued together with the Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 and the Circulars giving guidance on the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of the combined financial statements.

2. Statement on the compliance with the accounting standards and system

The Management Board ensures to follow all the requirements of the Vietnamese Accounting Standards and System issued together with the Circular No. 200/2014/TT-BTC dated 22 December 2014, Circular No. 53/2016/TT-BTC dated 21 March 2016 as well as other Circulars giving guidance on the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of these combined financial statements.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Basis of preparation of financial statements

All the financial statements are prepared on the basis of accrued accounting (except for information related to cash flows).

Affiliated units organize their own accounting structures, dependent recording. The combined financial statements of the Company prepared on the basis of summarizing of financial statements of the affiliates. Revenue and balances among affiliates are eliminated when preparing these combined financial statements.

2. Foreign currency transactions

Exchange rate used to revalue the balance of monetary items in foreign currency at the end of accounting period is determined as rule as follows: regarding foreign currencies deposits in bank: buying rate of foreign currencies of bank where the Company opened foreign currencies account

3. Cash and cash equivalents

Cash includes cash on hand and demand deposits in bank. Cash equivalents include short-term investments of which the due dates cannot exceed 3 months from the dates of investment and the convertibility into cash is easy, and which do not have risks in the conversion into cash as of the reporting date.

4. Financial Investments

Trading securities

Investments are classified as trading securities when held for the purpose of buying and selling for profit.

Trading securities are recorded in accounting books at cost. The original cost of trading securities is determined according to the fair value of payments at the time the transaction occurs plus costs related to the transaction of purchasing trading securities.

The time to record trading securities is the time the Company has ownership, specifically as follows:

For listed securities: recorded at the time of order matching (T+0).

For unlisted securities: recorded at the time of official ownership according to the provisions of law.

Interest, dividends and profits of periods before trading securities are purchased are accounted for as a decrease in the value of those trading securities. Interest, dividends and profits of periods after trading securities are purchased are recorded as revenue. Dividends received in shares are only tracked by the number of additional shares, the value of shares received is not recorded.

Provision for devaluation of trading securities is made for each type of security that is traded on the market and has a fair value lower than the original cost. The fair value of trading securities is determined as follows: For securities listed on the stock market: closing price on the most recent transaction date up to the end of the accounting period.

Increases and decreases in provisions for devaluation of trading securities that need to be appropriated at the end of the accounting period are recorded in financial expenses.

5. Accounts receivables

Accounts receivable are presented in accordance with book values less provisions for bad debts.

The classification of accounts receivable into receivables from customers and other receivables is done as follows:

- Accounts receivable from customers reflect commercial receivables generating from purchase- sale transactions between the Company and buyers which are independent units against the Company.
- Other accounts receivable reflect non-commercial or non-trading accounts receivable, unrelated to purchase-sale transactions.

Provision for bad debts is made for each bad debt after being offset with payable liabilities (if any). The appropriation rate is based on the overdue debt age of debts or the estimated loss. Details are as follows:

- As for overdue debts:
 - 30% of the value for debts overdue from over 6 months to under 1 year.
 - 50% of the value for debts overdue from 1 year to under 2 years.

- 70% of the value for debts overdue from 2 years to under 3 years.
- 100% of the value for debts overdue from 3 years and over.
- As for doubtful debts: provision is made basing on the estimated loss.

Increases, decreases of balance of provision for bad debts which need appropriating as of the balance sheet date are recorded into administrative overheads.

6. Inventories

Inventories are recorded in accordance with the lower value between the historical costs and the net realizable values.

Costs of inventories are determined as follows:

- For work-in-process: They comprise costs of main materials, labor and other directly related costs.

Ex warehouse prices are determined in accordance with the weighted average method and recorded in line with the perpetual recording method.

Net realizable values are the estimated selling prices of inventories in an ordinary course of business less the estimated expenses on product completion and other necessary expenses on product consumption.

Provision for devaluation of inventories is recognized when their historical costs are higher than their net realizable values. Increases, decreases in balances of provision for devaluation of inventories which need appropriating as of the balance sheet date are recognized into costs of goods sold.

7. Prepaid expenses

Prepaid expenses comprise actual expenses arising but relevant to financial performance in several accounting periods. Prepaid expenses of the Company include expenses for “VINACONEX” Trademark transferred use right from Vinaconex Construction and Import - Export Joint Stock Corporation, tools, instruments and other long-term prepaid expenses. These prepaid are allocated in the prepayment term or the term in which corresponding economic benefit derived from these expenses.

Brand expenses

The franchised Trademark is the “VINACONEX” Trademark received from Vinaconex Construction and Import - Export Joint Stock Corporation under a license contract signed between two parties with a period of 20 years.

Tools, instruments

Expenses for tools, instruments being put into use are allocated into expenses in accordance with the straight-line method for a period of not exceeding 36 months

8. Tangible fixed assets

Tangible fixed assets are determined by their historical costs less accumulated depreciation. Historical costs of tangible fixed assets include expenses of the Company to have these fixed assets as of the dates they are ready to be put into use. Other expenses incurred subsequent to

These notes form an integral part of and should be read in conjunction with the accompanying combined financial statement

the initial recognition are included in historical costs of fixed assets only if they certainly bring more economic benefits in the future thanks to the use of these assets. Those which do not meet the above conditions will be recorded into expenses during the year

When a tangible fixed asset is sold or disposed, its historical and accumulated depreciation are written off, the any gain/loss arisen is posted into income or expenses during the year.

Tangible fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years of tangible fixed assets are as follows:

Fixed assets	<u>Years</u>
Buildings and structures	25 - 40
Machinery and equipment	7
Means of transportation and transmitters	8
Office equipment	3
Others	3

9. Intangible fixed assets

Intangible fixed assets are determined by their historical costs less accumulated depreciation.

Historical costs of intangible fixed assets include all the expenses of the Company to have these fixed assets as of the dates they are ready to be put into use. Costs related to intangible fixed assets, which are incurred after initial recognition, are recognized as operating costs in the period unless these costs are associated with a specific intangible fixed asset and increase economic benefits from these assets.

When an intangible fixed asset is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain/loss arisen is posted into income or expenses during the year.

Intangible fixed asset of the Company comprises:

Computer software program

Expenses related to computer software, which is not an integrated part of the related hardware, are capitalized. Historical cost of computer software includes all the expenses paid until the date the software is put into use. Computer software is amortized in accordance with a straight-line method in 4 years.

Copyrights, patents

Historical cost of Author's copyrights, patents which purchased from third party comprises its purchase price, including non-refundable purchase taxes and registration charges. Author's copyrights, patents are amortized on a straight-line method in 3 years.

10. Construction in progress

Construction in progress expenses represent directly related expenses (including related interest expenses in accordance with the Company's accounting policies) to assets that are in

These notes form an integral part of and should be read in conjunction with the accompanying combined financial statement

construction progress, machinery and equipment being installed for purposes of production, rental and management as well as expenses related to fixed assets under repairing. These assets are recorded at historical cost and are not amortised.

11. Liabilities payable and accrued expenses

Liabilities payable and accrued expenses are recognized for the amount payable in the future related to goods and services already received. Accrued expenses are recognized based on reasonable estimates on the amount payable.

The classification of accounts payable into payables to suppliers, accrued expenses and other payables is represented as follows:

- Payables to suppliers reflect trade payables occurred from purchase-sale transaction of goods, services, assets and the suppliers are independent units against the Company.
- Accrued expenses reflect payables for goods and services already received from suppliers or provided to customers but for which the payment has not been made due to lack of invoices or accounting documents and payables for employees on leave pay, appropriated operating costs.
- Other payables reflect non-trade payables or payables unrelated to purchase-sale transactions, provision of goods and services.

Liabilities payable and accrued expenses are classified into short-term and long-term ones in the combined balance sheet based on the remaining terms as of the balance sheet date.

12. Owner's equity

Owner's contribution capital

Owner's contribution capital is recognized in line with the amount actually contributed by the shareholders.

Share premiums

Share premiums are recorded in accordance with the difference between issuance price and face value of shares in the first issuance, additional issuance or the difference between reissuance price and book value of treasury stocks and the equity component of convertible bonds upon maturity. Direct expenses related to the additional issuance of shares and reissuance of treasury stocks are recorded to decrease share premiums.

13. Profit distribution

Profit after corporate income tax is distributed to the shareholders after appropriation of funds in accordance with the Company's Charter as well as legal regulations and being approved by the General Meeting of Shareholders.

The profit distribution to the shareholders considers non-monetary items in retained profit after tax which can have impacts on cash flows and possibility of dividend payment such as gains from revaluation of assets for capital contribution, revaluation of monetary items, financial instruments and other non-monetary items.

Dividends are recognized as liabilities payable upon the approval by the General Meeting of

Shareholders.

14. Recognition of sales and income

Sales of real estate

Sales of real estate that invested by the Company shall be recognized when all of the following conditions are satisfied:

- Real estates are fully completed and handed over to buyers, and the Company transfers most of risks and benefits associated with the ownership of real estate to buyers.
- The Company no longer holds management right of real estates as the real estate owner or control right on real estates.
- Sales are determined reliably.
- The Company has received or will receive economic benefits from transaction of selling real estates.
- Costs related to the transaction of selling real estates can be determined.

Sales from real estate sold in form of land plots

Sales of real estate sold in form of land plots under irrevocable contracts shall be recognized when all of the following conditions are satisfied:

- The Company has transferred most of risks and benefits incidents to the ownership of the land use right to the buyer.
- The amount of sales can be measured reliably.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.
- The Company received or shall probably receive the economic benefits associated with the transaction.

Interests

Interests are recorded based on the term and the interest rates applied for each period.

15. Borrowing costs

Borrowing costs include loan interest and other costs directly related to borrowings.

Borrowing costs are recognized into expenses when arising. In case borrowing costs directly relate to construction investment or producing assets in progress which need a long time enough (over 12 months) to be put into use for intended purposes or to be sold, they are included in value of those assets. For a loan particularly serving construction of fixed assets, investment properties, loan interest is capitalized even though construction duration is less than 12 months. Income incurred from temporary investment in loans is recorded reduce to historical costs of related assets

In the event that general borrowings are partly used for the acquisition, construction or production of an asset in progress, the costs eligible for capitalization will be determined by applying the capitalization rate to average accumulated expenditure on construction or production of that asset. The capitalization rate is computed at the weighted average interest

rate of the borrowings not yet paid during the period, except for particular borrowings serving the purpose of obtaining a specific asset.

16. Costs

Costs are amounts reducing economic benefits, recorded at the time the transaction arises or shall be likely to arise in the future regardless of spending money or not.

Costs and revenues set up by it must be recognized simultaneously on the principle of conformity. In case, conformity principle may conflict with precautionary principle in accounting, costs are recognized based on the nature and regulations of accounting standards to reflect transactions honestly and reasonably.

17. Tax

Corporate income tax only includes current income tax which is the tax amount computed based on the taxable income. Taxable income is different from accounting profit due to the adjustments of temporary differences between tax and accounting figures as well as those of non-taxable or non-deductible income and expenses, losses transferred.

The determination of corporate tax payable of the Company is based on the prevailing regulations on taxes. However, these regulations change for each period and regulations on taxes for various transactions can be explained in various ways. Therefore, the tax amount could change when being examined by the Tax Office.

The Company has declared and paid these taxes in line with the prevailing regulations.

18. Related parties

A party is considered a related party in case one party is able to control the other or to cause considerable effects on the financial decisions as well as the operations of the other. A party is also considered a related party in case of together being controlled or affected significantly.

In the consideration of relations among related parties, the nature of relations is paid more attention than the legal form.

19. Segment reporting

A business segment is a distinguishable component that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

A geographical segment is a distinguishable component that is engaged in providing products or services within a particular economic environment and that is subject to risks and returns that are different from those of components operating in other economic environments.

Segment information is prepared and presented in line with the accounting policies applied for preparation and presentation of the combined financial statements of the Company.
