NOTES TO THE FINANCIAL STATEMENTS

from April 1, 2025 to June 30, 2025

Office

II. ACCOUNTING PERIOD, ACCOUNTING CURRENCY

1. Accounting period

The first accounting period of Saigon Traffic Construction Joint Stock Company began from May 5, 2016, to December 31, 2016, when it officially transitioned from a State-owned Enterprise to a Joint Stock Company according to the Business Registration Certificate No. 0300460907, 9th amendment on May 5, 2016, issued by the Ho Chi Minh City Department of Planning and Investment.

The accounting period for the subsequent years of the company begins on January 1st and ends on December 31st of each year.

2. Accounting currency

The Company's accounting currency is Vietnam Dong ("VND").

III. ACCOUNTING STANDARDS AND SYSTEM

1. Accounting system

The Company applies the Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, by the Ministry of Finance, and the guiding, supplementary, and amended Circulars.

2. Statement of compliance

The Company has applied the Vietnamese Accounting Standards and the guiding documents issued by the State. The financial statements are prepared and presented in accordance with the regulations of the standards, the circulars guiding the implementation of the standards, and the current accounting system in use.

IV. APPLICABLE ACCOUNTING POLICIES

1. Principles of recognition of cash and cash equivalents

Cash and cash equivalents comprise cash on hand, bank deposits, Cash in transit and short-term investments with a maturity or redemption period of no more than 3 months from the purchase date, easily convertible into a defined amount of cash, and with minimal risk in converting to cash.

2. Recognition principles for financial investments

These are investments made outside the enterprise for the purpose of effectively utilizing capital to improve the efficiency of the company's operations, such as equity investments in subsidiaries, joint ventures, affiliates, securities investments, and other financial investments, etc.

Classification of investments in financial statements is based on the following principles:

- Investments with a remaining recovery period of no more than 12 months or within one operating cycle are classified as short-term.
- Investments with a remaining recovery period of more than 12 months or over one operating cycle are classified as long-term.

3. Recognition principles for receivables

Receivables are monitored in detail of receivable terms, receivable parties, original currency and other factors depending on the Company's managerial requirements.

The classification of receivables is carried out according to the following principles:

- Trade receivables: trade receivables arising from buying-selling transactions between the Company and buyers, such as sales of goods, provision of services, sale/disposal of assets;
- Inter-company receivables: Receivables between the parent company and its dependent subordinate units without legal entity status;
- Other receivables: Other receivables include non-trade receivables, not related to buying-selling transactions.

Classification of receivables when preparing the financial statements according to the following principles:

- Receivables with a remaining recovery period of no more than 12 months or within one operating cycle are classified as short-term.
- Receivables with a remaining recovery period of 12 months or more, or beyond one operating cycle, are classified as long-term.

NOTES TO THE FINANCIAL STATEMENTS

from April 1, 2025 to June 30, 2025

Office

Allowance for doubtful debts: Doubtful receivables are provisioned for bad debts when preparing the financial statements. The recognition or reversal of this provision is done at the time of preparing the financial statements and is recorded as an administrative expense for the period. For receivables that have been outstanding for many years, and for which the Company has made all efforts to collect the debt but has still been unsuccessful, and determines that the debtor is truly unable to pay, the Company may need to take procedures to sell the debt to a debt purchasing company, write off the doubtful receivables, or remove them from the accounting books (in accordance with the laws and the Company's charter).

In addition, the Company has doubtful receivables related to the approval of the final settlement for the SPDVCI projects carried out before the official transition to a joint-stock company, which are awaiting guidance on how to handle them from the competent authorities.

4. Recognition principles for inventories

Inventories are recognized as cost. If the net realisable value is lower than the cost, it must be measured at the net realisable value. The cost of inventories comprises costs of purchases, processing costs, and other directly relevant costs incurred in bringing the inventories to their present location and conditions

The value of inventories is calculated using the First In, First Out (FIFO) method.

Inventories are recorded for using the perpetual method.

Allowance for inventories: An allowance is made for the estimated loss in value due to the impairment in the value of materials, finished goods, and inventories owned by the Company that may occur (through diminution, damage or obsolescence, etc.) based on reasonable evidence of the impairment at the end of the financial year. Any increase or decrease in this allowance is recognized in the cost of sales on the income statement.

5. Recognition principles for fixed assets

Tangible fixed assets and intangible fixed assets are recognized as costs. During use, tangible fixed assets and intangible assets are recorded at their original cost, accumulated depreciation, and remaining value.

The cost of a fixed asset comprises its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, improvements and renewals are added to the carrying amount of the assets, expenditures for maintenance and repair are charged as expenses for the current year.

When a asset is disposed of, its cost and accumulated depreciation are written off in the financial statements, and then any loss arising from such disposal is included in the income statement.

Depreciation is computed on a straight-line basis over the estimated useful lives of tangible fixed assets. The depreciation years applied are as follows:

<u>Fixed assets</u>	<u>Years</u>
Buildings and structures	05 - 50 years
Machinery and equipment	08 - 15 years
Vehicles	06 - 10 years
Instrument & tools for management	03 - 06 years
Other assets	04 years
Other intangible assets	03 - 06 years

Assets are revalued during the privatization process, and the depreciation of the aforementioned fixed assets starts from the date the company is granted the business registration certificate for its conversion into a joint-stock company.

Fixed assets that have fully depreciated are still being used by the Company because the Company consistently performs well in the maintenance and servicing of vehicles and equipment.

6. Recognition principles for prepaid expenses

The calculation and allocation of prepaid expenses into production and business costs for each accounting period are based on the nature and magnitude of each type of expense to select a reasonable allocation method and basis.

The classification of prepaid expenses in the preparation of financial statements should follow these principles:

- Prepaid amounts for goods or services to be provided within 12 months or within a normal operating cycle from the date of payment are classified as short-term prepaid expenses.

- Prepaid amounts for goods or services to be provided over a period exceeding 12 months or longer than a normal operating cycle from the date of payment are classified as long-term prepaid expenses.

NOTES TO THE FINANCIAL STATEMENTS

from April 1, 2025 to June 30, 2025

Office

The value of goodwill is re-evaluated during the equitization process, based on the Enterprise Valuation Report prepared by DongA Bank Securities Company. It is amortized over a period not exceeding 10 years, starting from the official conversion date into a Joint Stock Company.

7. Recognition principles for payables

Payables are monitored in detail by remaining payable terms, payable parties, original currency, and other factors depending on the company's managerial requirements.

The classification of payables is carried out according to the following principles:

- Trade payables: trade payables arising from transactions involving the purchase of goods, services, or assets, as well as payables incurred during import transactions through consignees;
- Inter-company payables: Payables between the parent company and its dependent subordinate units without legal entity status;
- Other payables: Other payables include non-trade payables, not related to buying-selling transactions, or provision of goods and services.

Classification of payables when preparing the financial statements according to the following principles:

- Payables with a remaining payment period of no more than 12 months or within one operating cycle are classified as short-term.
- Payables with a remaining payment period of 12 months or more, or beyond one operating cycle, are classified as long-term.

8. Recognition principles for borrowings and capitalizing borrowing costs

Borrowing costs directly related to loans are recognized as financial expenses in the period, except in cases where borrowing costs are directly associated with the construction investment or production of assets in progress that are included in the value of those assets (capitalized) when the conditions specified in the Accounting Standard "Borrowing Costs" are met.

Borrowing costs directly related to the construction investment or production of unfinished assets are included in the value of those assets (capitalized), including interest on loans, allocation of discounts or premiums when issuing bonds, and ancillary costs arising from the loan application process.

9. Recognition principles for equity

Payables for goods and services received from suppliers during the period but not yet paid due to the lack of invoices or incomplete documentation, as well as payables to employees, are recognized as production and business expenses in the period to ensure that actual expenses, when incurred, do not cause sudden fluctuations in production and business costs, while adhering to the matching principle between revenue and expenses. The accrual of accrued expenses must be calculated rigorously and supported by reasonable and reliable evidence. When these expenses are incurred, any differences from the accrued amounts should be adjusted by recording additional or reduced expenses corresponding to the difference.

10. Recognition principles for equity

The owner's equity is recognized based on the actual capital contributed by the owner.

Retained profits represents the profit from the company's activities after adding (+) or subtracting (-) adjustments due to the retrospective application of changes in accounting policies and retrospective corrections of material errors from prior years.

The distribution of the company's business operating profits must comply with the current financial policies.

When distributing profits, consideration must be given to non-monetary items within the retained profits that may affect cash flow and the company's ability to pay dividends and profits.

11. Recognition principles for revenue

a. Recognition principles for revenue from sales of goods

Revenue from sales of goods is recognized when all of the following conditions are satisfied:

- The significant risks and rewards of ownership of the goods or products have been transferred to the buyer;
- The company no longer retains management rights or control over the goods as the owner.;
- Revenue can be reliably measured.;
- The company has received or will likely receive economic benefits from the sales transaction;
- The costs associated with the sales transaction can be reliably determined.

b. Recognition principles for financial income

Financial income includes income generated from interest, royalties, dividends, profit sharing, and other financial incomes. The company recognizes dividends and profit sharing when it has the entitlement to receive dividends or profits from capital contributions.

NOTES TO THE FINANCIAL STATEMENTS

from April 1, 2025 to June 30, 2025

Office

c. Recognition principles for revenue from construction contracts

Revenue from construction contracts is recognized in one of the following two cases:

- The construction contract stipulates that the contractor is paid according to the set schedule: when the contract performance results are reliably estimated, the revenue is recognized corresponding to the completed volume determined by the contractor.
- The construction contract stipulates that the contractor is paid based on the value of performed work volume: when the contract performance results are reliably estimated and certified by customers, the revenue is recognized by reference to the completed work volume certified by the customers.

When the outcome of contract execution cannot be reliably estimated, the recognized revenue is equivalent to the costs incurred, and the reimbursement is relatively certain.

d. Recognition principles for other income

Other income includes revenue outside the company's production and business activities, such as: proceeds from the sale or disposal of fixed assets; penalties received for customer contract violations; compensation from third parties to offset asset losses; recovery of written-off bad debts; payables where creditors cannot be identified; income from gifts, monetary gifts, and in-kind gifts ...

12. Recognition principles for construction revenue deductions

The adjustment to reduce construction revenue is made upon receiving the decision from the investor or competent authorities approving the final settlement, which reduces the cost of completed construction.

13 Recognition principles for cost of sales

Cost of sales comprises the cost of products, goods, services, and investment properties; the production cost of construction products sold during the period; and expenses related to investment property business activities.

The value of inventory shortages and losses is recognized in the cost of sales after deducting any compensation received (if any).

For cost of direct raw materials consumed over the normal level, fixed labour cost and manufacturing overheads not allocated to finished goods are recorded directly into the cost of sales (after deducting compensations, if any) even if products and goods are not yet determined to be consumed.

14 Recognition principles for financial expenses

Financial expenses include costs related to financial activities, such as: expenses or losses associated with financial investment activities; costs of lending and borrowing funds; expenses for joint venture and associate capital contributions; losses from the transfer of securities; provision for the decline in value of trading securities; provisions for investment losses in other entities; losses incurred from foreign currency sales and foreign exchange rate differences

15 Recognition principles for selling expenses, general and administration expenses

Selling expenses represent expenses that are incurred in the process of selling products, goods, and providing services.

General and Administrative Expenses reflect the company's costs, including salaries, social insurance, health insurance, unemployment insurance, and trade union fees for management staff; cost of office materials, tools, and depreciation of fixed assets used for company management; land rental fees and business license tax; provisions for doubtful debts; outsourced services; and other monetary expenses...

Selling expenses and general and administration expenses are allocated to business activities based on the company's chosen criteria (revenue or profit).

16 Recognition principles for current and deferred income tax expenses

Current income tax expenses: is the amount of income taxes payable determined based on taxable profit and the current income tax rate, and tax adjustments payable related to the previous period.

The Company's tax reports are subject to examination by tax authorities. As the application of tax laws and regulations to various transactions can be interpreted in different ways, the tax figures presented in the financial statements may be subject to changes based on the final decisions of the tax authorities.

17 Related parties

Parties are considered related if one party has the ability to control or significantly influence the other party in making financial and operating policy decisions. Parties are also regarded as related if they are subject to common control or common significant influence.

NOTES TO THE FINANCIAL STATEMENTS

from April 1, 2025 to June 30, 2025

Office

In considering the relationship between related parties, the nature of relationship is focused more than its legal form.

18 Segment reporting

Segment information is presented by the Company's geographic regions and business sectors. Segment reports by geographic regions and business sectors are based on the Company's internal reporting and management structure.

The results of segment reporting include items directly allocated to a segment as well as items allocated to segments based on a reasonable criterion (revenue or profit).

19 Financial instrument

a. Financial Assets

The Company's financial assets include cash and short-term deposits, trade receivables, other receivables, loans, and listed and unlisted financial instruments.

Financial assets are recognized on the purchase date and derecognized on the sale date. At initial recognition, financial assets are recorded at cost plus directly attributable transaction costs associated with the purchase or issuance.

b. Financial liabilities and equity instruments

Financial instruments are classified as either financial liabilities or equity instruments at initial recognition based on their nature and definitions of financial liabilities and equity instruments.

The Company's financial liabilities include trade payables, other payables, and borrowings.

At initial recognition, all financial liabilities are recorded at their cost plus directly attributable transaction costs related to their issuance.

Equity Instruments: These are contracts that represent the residual interest in the Company's assets after deducting all its liabilities.

Offsetting Financial Instruments: Financial assets and financial liabilities are offset and presented at net value on the Balance Sheet when, and only when, the Company has a legal right to offset the recognized amounts and intends to settle on a net basis or recognize the asset and settle the liability simultaneously.
