*“Re: Explanation of profit after-tax
figures for the first six months of 2025”*

THE SOCIALIST REPUBLIC OF VIETNAM

Independence – Freedom - Happiness

Ho Chi Minh City, August 13, 2025

To: THE HANOI STOCK EXCHANGE

The shares of Tam Duc Cardiology Hospital Joint Stock Company officially started trading on the Upcom market since February 6, 2017, with the stock code TTD.

According to the Company's financial statements for the first six months of 2025, the after-tax profit for this period increased by 33.74% compared to the first six months of 2024.

Operating revenue rose by 9.12% year-on-year, while the growth rate of expenses was lower, resulting in higher profit. The reduction in expenses was mainly due to the following reasons: the ratio of drug and medical supplies expenses to operating revenue declined; the cost of meals for patients and staff decreased due to the transition to a new meal supply organization starting from October 2024; Depreciation and amortization costs decreased because certain assets, tools, and long-term allocation costs were fully depreciated, with minimal new additions. In addition, the company increased its term deposits at banks, resulting in higher financial income compared to the same period last year, which also contributed to the higher profit.

Sincerely,

GENERAL DIRECTOR

Dr. DO VAN BUU DAN
