FINANCIAL STATEMENT EXPLANATION

These explanatory notes are an integral part and should be read together with the accompanying financial statements.

I. GENERAL INFORMATION:

1.1. Ownership structure:

Investment & Trade Petroleum Joint Stock Company of Nghe An was established under Business Registration Certificate No. 2703001785 issued by the Department of Planning and Investment of Nghe An Province on February 25, 2008, and subsequent amendments. According to the 13th amended Business Registration Certificate dated June 10, 2016, the company's charter capital is VND 150,000,000,000, with a par value of VND 10,000 per share.

1.2. Business activities: The company's business activities include:

- Real estate business, ownership, and rental of land use rights.
- Construction of civil engineering projects, including industrial park infrastructure and technical infrastructure.
- Construction of various types of buildings.
- Road freight transport.
- Investment trust services.
- Wholesale of construction materials and installation equipment.
- Specialized design services, including consultancy, verification of design documents, and cost estimation for civil, industrial, transport, irrigation, and technical infrastructure projects.
- Management consultancy services, including investment project consultancy and bidding consultancy.
- Mineral exploration, mining, processing, and trading.
- Specialized construction activities, including investment in commercial centers, urban areas, industrial zones, and hydropower projects.
- Architectural and related technical consultancy services, including construction supervision.
- Road and railway construction.
- Financial support services.
- Passenger transport services.
- Rental of surveying and construction equipment.

II. BASIS FOR FINANCIAL STATEMENTS PREPARATION AND ACCOUNTING PERIOD:

2.1. Basis for financial statements preparation:

The accompanying financial statements are presented in Vietnamese Dong (VND) on a historical cost basis, in compliance with Vietnamese Accounting Standards, Vietnamese Accounting System, and other relevant accounting regulations in Vietnam.

2.2. Accounting period:

The company's fiscal year begins on January 1 and ends on December 31.

III. ACCOUNTING STANDARDS AND PRINCIPLES:

The company complies with current Vietnamese Accounting Standards in preparing these financial statements.

The financial statements are prepared under Circular No. 200/2014/TT-BTC dated December 22, 2014, of the Ministry of Finance.

Accounting method applied: General journal.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

4.1. Accounting estimates:

The preparation of financial statements in compliance with Vietnamese Accounting Standards (VAS), the Vietnamese Accounting System (VAS), and other prevailing accounting regulations in Vietnam requires the Management Board to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the disclosure of contingent liabilities and assets at the date of the financial statements, as well as the reported amounts of revenue and expenses throughout the financial year. Actual results may differ from these estimates and assumptions.

4.2. Cash and cash equivalents:

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with high liquidity that are readily convertible into cash and are subject to an insignificant risk of changes in value.

4.3. Inventories:

Inventories are stated at the lower of cost and net realizable value. The cost of inventories includes direct material costs, direct labor costs, and applicable overhead costs incurred to bring the inventories to their present location and condition. The cost of goods sold is determined using the weighted average method. Net realizable value is calculated as the estimated selling price less the costs required to complete the sale, including marketing, selling, and distribution expenses.

The Company's inventory provision is made in accordance with prevailing accounting regulations. Accordingly, the Company is allowed to make provisions for obsolete, damaged, or low-quality inventories when the actual value of inventories exceeds their net realizable value at the end of the financial year.

4.4. Tangible fixed assets and depreciation:

Tangible fixed assets are presented at cost, net of accumulated depreciation.

The cost of tangible fixed assets includes the purchase price and all directly attributable costs necessary to bring the asset into a usable condition.

The cost of self-constructed or self-produced tangible fixed assets includes actual construction or production costs incurred, along with installation and trial operation costs.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

- Buildings: 5 – 6 years
- Machinery & Equipment: 3 – 7 years
- Transportation Means: 4 – 7 years

- Office Equipment: 3 – 6 years
- Other Fixed Assets: 3 – 4 years

4.5. Construction in progress:

Assets under construction for production, rental, management, or any other purpose are recognized at cost. These costs include service costs and related borrowing costs in accordance with the Company's accounting policies. Depreciation of these assets is applied similarly to other assets, beginning when the asset is in a ready-for-use state.

4.6. Long-term prepaid expenses:

Other long-term prepaid expenses include tools, equipment, small components, marketing, and advertising costs that are expected to provide future economic benefits to the Company for at least one year. These costs are capitalized as long-term prepaid expenses and allocated to the Income Statement using the straight-line method over three years, following prevailing accounting regulations.

4.7. Revenue recognition:

Revenue is recognized when the outcome of a transaction can be reliably determined and when the Company is likely to receive economic benefits from it. Sales revenue is recognized upon delivery and transfer of ownership to the buyer.

Interest income from deposits is recognized on an accrual basis, determined based on account balances and applicable interest rates.

4.8. Construction contracts:

When the outcome of a construction contract can be reliably estimated, revenue and related costs are recognized based on the percentage of completion method as of the financial year-end. This percentage is calculated as the ratio of incurred costs for completed work at the reporting date to the total estimated contract costs unless the incurred costs do not reasonably reflect the progress of the work performed. These costs may include additional expenses, compensation, and performance-related bonuses agreed upon with the client.

If the outcome of a construction contract cannot be reliably estimated, revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable.

4.9. Provisions:

Provisions are recognized when the Company has a present obligation as a result of a past event and it is probable that the Company will be required to settle the obligation. Provisions are determined based on management's estimates of the necessary costs to settle the obligation as of the reporting date.

4.10. Taxes:

Corporate income tax represents the total amount of current tax payable and deferred tax.

Current tax liabilities are calculated based on taxable income for the year. Taxable income differs from net profit presented in the Income Statement because taxable income excludes certain non-taxable income, expenses deductible in different periods, and non-deductible expenses. The Company determines corporate income tax based on prevailing tax regulations, which may change over time. The final determination of corporate income tax depends on the tax audit results of the competent tax authorities.

Deferred income tax is calculated on the differences between the carrying amounts and tax bases of assets and liabilities in the financial statements and is recognized using the balance sheet method. Deferred tax liabilities are recognized for all temporary differences, while deferred tax assets are recognized only when it is probable that future taxable profits will be available to utilize the deductible temporary differences.

Deferred tax is measured using the expected tax rates applicable in the period when assets are recovered, or liabilities are settled. Deferred tax is recognized in the Income Statement unless it relates to items recorded directly in equity, in which case it is also recognized in equity.

Deferred tax assets and liabilities are offset when the Company has a legally enforceable right to offset current tax assets against current tax liabilities, and when deferred tax assets and liabilities relate to corporate income tax managed by the same tax authority, with the intention to settle current tax liabilities on a net basis.

Other taxes are applied in accordance with prevailing tax laws in Vietnam.
