1. Human Resources

The Board of Directors has 7 members, including 1 chairman and 1 vice chairman; 4 members reside in Hanoi; 3 members reside in Son La; and 2 members represent the state's capital stake.

2. Operating context

- Advantages:

The state's policy mechanisms are becoming increasingly transparent and specific; the People's Committee of Son La province, relevant departments, and localities are creating favorable conditions for the company's production and business activities.

Board members possess competence, professional experience, and legal knowledge, and demonstrate a high level of responsibility in their work.

The facilities and equipment are constantly being improved to meet the demands of the job.

The Board of Directors, with their assigned duties and powers in accordance with the Charter, have consistently performed their assigned tasks well, demonstrating a high sense of responsibility to the collective and making positive contributions to the management of production and business operations. The Board of Directors has always closely monitored the practical situation, leveraged the port's strengths, and provided guidance and direction to the

Executive Board to achieve the goals and tasks set by the Annual General Meeting of Shareholders. All production and service activities are customer-centric. Market development strategies and plans, management methods, training, etc., have been emphasized and implemented rigorously .

- Difficulties

The geographical distance between Hanoi and Son La is quite far, posing difficulties for the Board of Directors members in Hanoi, as well as making the delivery of documents difficult and time-consuming.

Many government regulations and policies related to the water supply sector require time to understand and implement.

II. ASSESSMENT OF THE COMPANY'S OPERATION DURING TERM IV (2020-2025)

1. Results achieved:

In accordance with the Shareholders' General Meeting Resolution, the Board of Directors has determined and implemented the annual production and business plan and direction. Throughout its five-year term, the Board of Directors has performed its supervisory function to ensure that the set objectives are achieved in accordance with the objectives, directions, and plans.

The Board of Directors in its fourth term focused on comprehensively assessing the capacity of the Company's water supply infrastructure system, forecasting development potential, and subsequently developing a long-term investment plan with specific goals as a basis for annual investment implementation, in line with financial capacity and investment efficiency.

The Board of Directors prioritizes the company's human resources, directing and supervising the General Director in developing a lean and efficient workforce, and prioritizing advanced technological solutions to reduce staff numbers.

Thanks to comprehensive and decisive solutions, the company's business performance in the 2020-2025 period has been very positive and fundamental, specifically as follows:

No.	Content	Unit	Year						Comparison of 2025/2020		Note

2. Difficulties and limitations

Water production growth has been low due to near-saturation of the customer base, and water prices were only adjusted at the beginning of 2026, with only a modest increase.

Many large households and customers in suburban and adjacent rural areas drill wells for their own use of clean water. Maintaining and expanding the service delivery area still faces many challenges.

The skill level and quality of the workforce are still low, and the proportion of female workers is quite high.

III. SPECIFIC ACTIVITIES OF THE BOARD OF DIRECTORS FOR TERM IV (2020-2025)

1. Company Management

The company's governance activities comply with the Corporate Governance Regulations, the Company Charter, and the Board of Directors' Operating Regulations. Closely monitoring market fluctuations, the Board of Directors directed the Executive Board to make appropriate adjustments to the business plan.

The resolutions cover matters within the Board of Directors' authority, such as:

Deciding on the company's organizational structure and internal management regulations. Deciding on the company's strategy, medium-term development plan, and annual business plan;

Decisions on investment options and investment projects are made within the authority and limits prescribed by law;

The Board of Directors has formulated a development strategy, short-term and medium-term operational plans, basic plan targets for each quarter and year, and provided direction for the Management Board to oversee the Company's operations.

2. Difficulties and limitations in management:

Due to geographical distance and transportation difficulties, some processing issues are still delayed because documents have to be sent by courier.

The Board of Directors has not fully considered the strategic goals for the Company's medium-term and long-term development; nor has it been decisive and thorough in some investment, construction, and water price approval processes.

3. Preserving and developing capital:

Capital preservation and growth were well managed throughout the term. Compared to the beginning of the term, the company's charter capital increased from 100 billion to 125 billion, and total assets increased from 143 billion to 178 billion. Annual dividends were paid on time, and all taxes and fees were fully contributed to the state as required.
