- Revenue in 2025 increased compared to 2024 but did not meet the initial plan, profit after tax was negative, and the loss decreased by 26% compared to 2024 (-76.93 billion VND) for the following reasons:
 - ✓ Revenue in 2025 increased by 43% compared with 2024 as the Company signed and executed additional contracts during the year. Accordingly, cost of goods sold increased by 40%; resulting in gross profit increasing by 58% compared with the previous year.
 - ✓ General and administrative expenses decreased by 49%, mainly due to the reversal of the provision for doubtful receivables during the year, together with the recognition of a reduction in land lease expenses for 2024 and 2025.
 - ✓ Other profit improved by 125% mainly due to income generated from the disposal of fixed assets during the period. In addition, the Company did not incur any penalties for late tax payments in 2025.

These are the main factors contributing to a 26% reduction in the Company's loss after tax in the audited financial statements for 2025 compared with 2024.
