NOTES TO FINANCIAL STATEMENTS

From January 01, 2026 to March 31, 2026

**I. Corporate information**

1. Ownership structure : Joint stock company

+ PetroVietnam Tank Pipeline Construction Company, formerly known as PetroVietnam Tank Pipeline Construction and Installation Co., Ltd., was established under Decision No. 02/QĐ-HĐQT-TCT dated December 21, 2007 and transformed into a Joint Stock Company under Decision No. 963/QĐ-XLĐK dated November 16, 2009 of the Board of Directors of the Joint Stock Company PetroVietnam Construction (now PetroVietnam Construction Joint Stock Corporation).

The company operates under the Enterprise Registration Certificate No. 3500833615 issued for the first time on November 26, 2009 by the Department of Planning and Investment of Ba Rịa - Vũng Tàu province and amended for the 14th time on January 23, 2024.

The Company's head office is located at: No. 35G, 30/4 Street, Tam Thang Ward, Ho Chi Minh City.

The Company's charter capital is: VND 200,000,000,000, equivalent to 20,000,000 shares, par value of each share is VND VND 10,000 .

+ Major shareholders of the company

+ Petrovietnam Construction Joint Stock Corporation	51,00%
---	--------

2. Business field: Construction of works

3. Main business lines and activities:

The Company's business activities include:

- Construction of pipelines, tanks, construction of pipelines, gas, gasoline, oil and water pipelines,...
- Installation of other construction systems, installation of electrical systems.
- Completion of construction works: Maintenance, repair and corrosion prevention of oil and gas works.
- Manufacture of metal containers, tanks and containers.

4. Normal production and business cycle: Due to the characteristics of the Company's activities, mainly in the field of construction and installation, the Company does not have a fixed production and business cycle but depends on each contract signed with the investor.

5. Characteristics of the enterprise's operation in the fiscal year that affect the financial statements. The Company's revenue mainly comes from the main business activities of construction and supply of industrial products to PetroVietnam Construction Joint Stock Corporation and Vietnam National Industry and Energy Group. During the year, the Company was mainly accepted for the completed volume of old works with the Corporation. However, the service revenue increased due to the increase in the exploitation of the property leasing business. In order to improve business results, the Company expanded its commodity trading business. In addition, the Company has also worked with suppliers to carry out the handling of outstanding debts that generate other income of the Company.

The company is still in the process of implementing many large contracts, especially at the Long Phu 1 Thermal Power Project with the general contractor being the Corporation. On the other hand, the Company is also actively implementing debt recovery measures as well as negotiating to extend due debts. In addition, the Company is also granted guarantees from Vietnam Maritime Commercial Joint Stock Bank - Vũng Tàu Branch, Loc Phat Vietnam Commercial Joint Stock Bank - Vũng Tàu Branch, Military Commercial Joint Stock Bank - Vũng Tàu Branch to serve the Company's activities in the year continuously.

6. Enterprise structure: Including the head office and branches that are construction and installation enterprises

- Construction Factory No. 1: established on March 16, 2015 in Vũng Tàu City, Ba Rịa - Vũng Tàu province (now Ho Chi Minh City)
- Construction Factory No. 2: established on March 16, 2015 in Vũng Tàu City, Ba Rịa - Vũng Tàu Province (now Ho Chi Minh City)
- Construction Factory No. 3: established on March 16, 2015 in Vũng Tàu City, Ba Rịa - Vũng Tàu Province (now Ho Chi Minh City)
- Construction Factory No. 5: established on November 30, 2011 in Vũng Tàu City, Ba Rịa - Vũng Tàu Province (now Ho Chi Minh City), dissolved under Decision No. 31/QĐ-HĐQT dated April 13, 2017

7. The number of employees at the end of the year or the average number of employees in the year. The total number of employees of the Company as of March 31, 2026 is: 100 people (as of January 1, 2026: 104 people).

8. Statement on the comparability of information in the financial statements: In case the financial statements are not comparable, they must clearly explain and explain the reasons for the incomparability between the information of the reporting period and the information of the comparative period on the explanation to the enterprise's financial statements.

9. Explanation of other information on the financial statements in accordance with relevant laws such as the law on enterprises and the law on securities,... Parties are considered involved if they have the ability to control or have significant influence over the other party in decision-making on financial and operational policies. The Company's stakeholders include:
- Businesses directly or indirectly through one or more intermediaries that have control over the Company or are under the control of the Company, or share control with the Company, including parent companies, subsidiaries and affiliates;
  - Individuals who directly or indirectly hold the Company's voting rights and have a significant influence on the Company, its key management personnel, and close family members of these individuals;
  - Enterprises in which the above-mentioned individuals directly or indirectly hold an important part of voting rights or have a significant influence on these enterprises.

## **II. Accounting periods and monetary units used in accounting:**

1. The Company's annual accounting period according to the calendar year starts from 01/01 and ends on 31/12 every year.
2. The currency used in accounting records is Vietnam Dong (VND).

## **III. Chuẩn mực và Chế độ kế toán áp dụng :**

1. Applicable accounting regime: The company applies the corporate accounting regime issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 of the Minister of Finance
2. Declaration of compliance with Vietnam Accounting Standards and Accounting Regime: The Company has applied Vietnamese Accounting Standards and standard guidance documents issued by the State. Financial statements are prepared and presented in accordance with all provisions of each standard and circular guiding the implementation of current enterprise accounting standards and regimes.

## **IV. Accounting policies, accounting estimates and relevant legal provisions apply:**

1. Basis for making financial statements: Financial statements are presented on the principle of cost price.  
The Company's financial statements are made on the basis of synthesizing financial statements of independent accounting member units and of the Company's Office.

In the Company's financial statements, internal transactions and internal balances related to assets, capital sources and internal receivables and payables, etc. have been excluded in their entirety.

### **2. Accounting estimates:**

The preparation of financial statements in compliance with Vietnamese accounting standards, Vietnam's corporate accounting regime and relevant legal regulations requires management to make estimates and assumptions that affect the figures on debts and assets and the presentation of debts and contingent assets at the end of the fiscal year as well as figures on revenue and expenses throughout the fiscal year.

Estimates and assumptions that have a material impact on financial reporting include:

- Provision for bad debts;
- Provision for inventory price reduction;
- Prepaid cost allocation estimates;
- The estimated useful life of the fixed asset;
- Corporate income tax estimates.

Estimates and assumptions are regularly evaluated based on past experience and other factors, including future assumptions that materially affect the Company's financial statements and are considered reasonable by the Company's management.

### **3. Tiền và các khoản tương đương tiền:**

- Tiền và các khoản tương đương tiền bao gồm tiền mặt tại quỹ, các khoản tiền gửi không kỳ hạn, các khoản đầu tư ngắn hạn, có khả năng thanh khoản cao, dễ dàng chuyển đổi thành tiền và ít rủi ro liên quan đến việc biến động giá trị.

### **4. Receivables:**

Receivables are monitored in detail according to the receivable term, receivables, receivables, and other factors according to the Company's management needs. Receivables are classified as short-term and long-term on the financial statements based on the remaining term of the receivables on the reporting date.

Provisions for bad debts shall be set aside for the following amounts: overdue receivables stated in economic contracts, loan contracts, contractual commitments or debt commitments and receivables that are not yet due but difficult to recover. In particular, the provision for overdue receivables is based on the time of repayment of principal under the initial purchase and sale contract, not taking into account the extension of debts between the parties and receivables that are not yet due but the debtor has fallen into bankruptcy or is undergoing dissolution procedures. missing, fleeing or the expected level of loss may occur.

### **5. Inventory:**

Inventory is initially recorded at the original price including: purchase costs, processing costs, and other directly related costs incurred to obtain inventory at the location and state at the time of initial recognition. After the initial recognition, at the time of making the financial statements, if the net realizable value of the inventory is lower than the original price, the inventory shall be recorded at the net realizable value.

The net realizable value is estimated based on the selling price of the inventory minus the estimated costs to complete the product and the estimated costs to sell the product.

The value of inventory is determined by the weighted average method.

Inventory is accounted according to the regular declaration method.

Method of determining the value of unfinished products at the end of the year: Unfinished production and business expenses are collected according to each project that has not been completed or has not yet recorded revenue, corresponding to the volume of unfinished work at the end of the year. Provisions for inventory price reduction shall be made at the end of the year based on the difference between the original price of inventories and the net realizable value.

6. Tangible fixed assets and depreciation: Tangible fixed assets and intangible fixed assets are initially recorded at the original price. In the course of use, tangible fixed assets and intangible fixed assets are recorded at historical cost, accumulated wear and tear and residual value.

Value after initial recognition

If the following expenses are incurred after the initial recognition that increase the expected future economic benefit obtained from the use of the tangible fixed asset in excess of the standard operating level as initially assessed, these expenses shall be capitalized as an additional historical cost of the tangible fixed asset.

Other expenses incurred after the fixed asset has been put into operation, such as repair, maintenance and overhaul expenses, shall be recorded in the report on business results in the year in which the expenses are incurred.

Depreciation of fixed assets is deducted by the straight-line method with the depreciation period estimated as follows:

- Houses and architectural objects for 10 - 40 years
- Other machinery and equipment 05 - 08 years
- Means of transport 05 - 10 years
- Office equipment 03 - 05 years
- 10-year land use rights

7. Accounting principles of contracts:

- When the results of contract performance can be reliably estimated, the revenue and expenses related to the contract are recorded in proportion to the part of the work completed at the end of the accounting year calculated as a percentage between the expenses incurred of the part of the work completed on the end date of the accounting year compared to the with the total estimated cost of the contract, except for the case where this cost is not equivalent to the completed construction and installation volume. This expense may include additional costs, compensation and performance bonuses as agreed with the customer. When the performance of the contract cannot be reliably estimated, the revenue is only recorded as equivalent to the cost of the contract that has been incurred for which reimbursement is relatively certain.

8. Principles of accounting for expenses pending allocation. Expenses incurred related to production and business results of many financial years shall be accounted into prepaid expenses for gradual allocation to business results in subsequent fiscal years.

The calculation and allocation of long-term prepaid expenses to production and business expenses in each fiscal year shall be based on the nature and extent of each type of expense in order to select reasonable allocation methods and criteria.

The types of prepaid expenses of the Company include:

- Tools and instruments include assets held by the Company for use in the course of normal business activities, with the historical cost of each asset being less than VND 30 million and therefore not eligible for recognition as fixed assets under current regulations. The historical cost of tools and instruments is allocated according to the straight-line method for a period of 02 to 03 years;
- Expenses for major repairs of fixed assets shall be recorded at historical cost and allocated according to the straight-line method for a useful period of from 02 years to 03 years;
- Other upfront costs are recorded at cost and allocated on a straight-line basis for useful life.

9. Principles of accounting payable to sellers. Liabilities are tracked according to the payable term, payables, type of original currency payable and other factors according to the Company's management needs. Payables are classified as short-term and long-term on the financial statements based on the remaining maturity of the payables on the reporting date

10. Accounting principles for payment of dividends and profits. Dividends payable to shareholders are recorded as payables on the Company's financial statement after the notice of dividend distribution by the Board of Directors of the Company and the closing date of the right to receive dividends of the Vietnam Securities Depository and Clearing Corporation.

11. Principles of recognition of payable expenses. Amounts payable for goods and services received from the seller or provided to the buyer in the reporting period but not actually paid and other payables such as interest expenses, payable loans, construction costs of works,... shall be recorded in the production and business expenses of the reporting period.

The recognition of payable expenses in production and business expenses in the year shall be carried out on the principle of consistency between revenues and expenses incurred in the year. The payable expenses will be settled with the actual expenses incurred. The difference between the advance deduction amount and the actual cost is refunded.

12. Provisions payable:

- Provisions payable are recognized when the Company has a current debt obligation as a result of an event that has occurred, and the Company is likely to have to pay this obligation.
- Provisions are determined on the basis of the management's estimate of expenses necessary to pay these debt obligations at the end of the accounting year. As of March 31, 2026, the Company's Board of Directors has cautiously assessed and believes that the Company does not have to set aside warranty provisions for the works that the Company constructs.

13. Principles for recognition of loans and financial lease debts. Loans and financial lease liabilities are monitored according to each lender, each loan contract and the payable term of loans and financial lease debts. In case of borrowing or debt in foreign currency, detailed monitoring shall be carried out in the original currency.

14. Principles for recognition of equity:

- The owner's investment capital is recorded according to the owner's actual contributed capital.
- Share capital surplus reflects the difference between the par value, direct costs associated with the issuance of shares and the issue price of shares (including cases of reissuance of treasury shares) and can be a positive surplus (if the issue price is higher than the par value and direct costs associated with the issuance of shares) or a negative surplus (if the price issuance below par value and direct costs related to the issuance of shares).
- Undistributed after-tax profit reflects business results (profit, loss) after corporate income tax and the Company's profit distribution or loss handling.

15. Principles and methods of recording turnover and other incomes:

- Revenue from sales and provision of services: Revenue is recognized when the Company is capable of receiving identifiable economic benefits with certainty. Revenue is determined according to the fair value of the amounts collected or to be collected after deducting trade discounts, discounts on sales and returned sales. The following specific recognition conditions must also be met when recognizing revenue.
  - Sales revenue: Most of the risks and benefits associated with ownership of the product or goods have been transferred to the buyer, the Company no longer holds the right to manage the goods as the owner of the goods or control of the goods;
  - Revenue from service provision: Determine the completed work on the date of making the Balance Sheet
  - Turnover from construction contracts. In case the construction contract stipulates that the contractor shall be paid according to the value of the performance of the performance of the construction contract, when the performance of the construction contract is reliably determined and certified by the client, the revenue and expenses related to the contract shall be recorded corresponding to the completed work certified by the client in the year reflected above invoices made.
- Increases and decreases in the performance of contracts, bonuses and other payments are only included in the turnover when agreed with the client. When the results of the performance of the construction contract are not reliably estimated, the revenue is only recorded as equivalent to the cost of the contract that has been incurred for which reimbursement is relatively certain. The cost of the contract is only recorded as an expense during the year when these costs have been incurred.
- Revenue from financial activities; Revenues arising from interest, royalties, dividends, distributed profits and other financial operating revenues are recognized when the following two (2) conditions are simultaneously satisfied:
    - + Capable of obtaining economic benefits from such transactions;
    - + Revenue is determined relatively certainly.

16. Principles of accounting for cost of goods sold. The cost of goods sold and services provided is the total cost incurred of finished products, goods, supplies sold and services provided to customers in the year, which is recorded in accordance with the revenue generated in the year and ensures compliance with the principle of prudence. Cases of loss of materials and goods in excess of norms, expenses in excess of normal norms, labor costs and fixed general production costs not allocated to the value of products in warehouses, provisions for inventory price reduction, lost inventories after deducting the collective responsibility, related individuals... are fully and promptly recorded in the cost of goods sold in the year even if products and goods have not been determined to be consumed.

17. Principles of accounting for financial expenses. The expenses recorded in the financial expenses are the cost of borrowing capital. The above amounts are recorded according to the total amount incurred in the period, not offset against the revenue from financial activities.

18. Principles of accounting for selling expenses and enterprise management expenses.

- Selling expenses reflect actual costs incurred in the process of selling products, goods or providing services. Selling expenses mainly include: salary costs of salespeople, costs of raw materials, materials and labor tools, depreciation expenses of fixed assets used for sales activities, expenses for outsourced services and other expenses.
- Enterprise management expenses reflect the general management expenses of the Company, mainly including: salaries of employees of the management department, social insurance, health insurance, trade union funds, unemployment insurance of managerial staff, costs of office materials, etc. labor tools, depreciation of fixed assets used for enterprise management, provision for bad debts, services purchased from outside and other expenses.

19. Principles and methods of recording current corporate income tax expenses: Current CIT expenses

- The current CIT expense is determined on the basis of taxable income in the year and the CIT rate in the current fiscal year.
- CIT rate of the current year: In the fiscal year ending March 31, 2026, the Company is entitled to apply the CIT rate of 20% for production and business activities with income subject to CIT.

20. Other accounting principles and methods:

- Basic profit per share is calculated by dividing the profit or loss after tax allocated to shareholders owning the Company's ordinary shares by the weighted average number of outstanding ordinary shares in the year.
- In reviewing each of the related parties' relationships for the preparation and presentation of financial statements, the Company pays attention to the nature of the relationship rather than the legal form of such relationships.
