**CMC INVESTMENT JOINT STOCK COMPANY  
ALLEY 83 - NGOC HOI STREET - YEN SO WARD - HANOI**

**FINANCIAL STATEMENT NOTES  
QUARTER I 2026**

**I. CHARACTERISTICS OF ENTERPRISE ACTIVITIES**

**1. Form of capital ownership**

CMC Investment Joint Stock Company (hereinafter referred to as the Company), formerly Construction and Mechanical Joint Stock Company No. 1, was converted from a State-owned enterprise under Decision No. 3854/QĐ-BGTVT dated December 9, 2004 of the Minister of Transport. The company operates under the business registration certificate No. 0103009571, first registered on October 14, 2005, issued by the Hanoi Department of Planning and Investment. On April 16, 2008, Construction and Mechanical Joint Stock Company No. 1 changed its name to CMC Investment Joint Stock Company. The Company changed its business registration for the 12th time on September 18, 2025.

The Company's charter capital is: VND 51,083,470,000 (Fifty-one billion, eighty-three million, four hundred and seventy thousand dong)

**2. Business fields**

The company's business fields are financial investment, construction and trade.

**3. Business lines**

- Construction of traffic, industrial, civil, irrigation and infrastructure works, residential areas, new urban areas, industrial parks, construction of power lines and transformer stations up to 35KV.
- Production of automobiles and auto parts of all kinds, mechanical and industrial products, repair, assembly, refurbishment, conversion, restoration of construction equipment and means of transport, processing of import and export goods
- Repair and assembly of automobiles.
- Production of other industrial products.
- Trading in houses, infrastructure of new urban areas, concentrated residential areas.
- Import and export and trading of materials, raw materials, petrol and oil agents, means of transport and spare parts, equipment, machinery of all kinds, consumer goods, agents for buying, selling and renting construction machinery and equipment.
- Production and trading of construction materials and precast material components.
- Trading of gasoline and their products.
- Trading of automobile transportation.
- Surveying and construction of traffic, irrigation, civil and industrial works.
- Investing in the construction of private kindergartens and preschools.
- Trading of all types of parking lots, leasing of offices.
- Trading of real estate.
- Investing in the construction of telecommunications works.

**II. ACCOUNTING PERIOD, CURRENCY UNIT USED IN ACCOUNTING**

- The Company's annual accounting period begins on January 1 and ends on December 31 every year.
- The currency unit used in accounting records is Vietnamese Dong (VND).

**III. ACCOUNTING STANDARDS AND REGIMES APPLIED**

## **1. Applied accounting regime**

The Company applies the enterprise accounting regime issued under Decision No. 15/2006/QĐ-BTC dated March 20, 2006, Circular No. 244/2009/TT-BTC dated December 31, 2009 on guidance, amendments and supplements to the enterprise accounting regime and decisions promulgating Vietnamese accounting standards, circulars guiding, amending and supplementing Vietnamese accounting standards issued by the Ministry of Finance effective until the end of the accounting year for preparing the annual financial statements.

## **2. Changes in accounting policies, commitment to comply with Accounting Standards and Regimes**

On January 6, 2009, the Ministry of Finance issued Circular No. 210/2009/TT-BTC guiding the application of international accounting standards on the presentation of financial statements and information disclosure for financial instruments (applicable from fiscal year 2011).

The Company's Board of Directors ensures that it has complied with the requirements of the accounting regime, Vietnamese accounting standards and documents guiding the regime and accounting standards issued by the Ministry of Finance in preparing financial statements.

## **3. Applicable accounting book form**

The Company applies the accounting form: Computerized.

# **IV. ACCOUNTING POLICIES APPLIED**

## **1. Basis of preparation of financial statements**

The financial statements are prepared and presented based on the basic accounting principles and methods, accrual basis, going concern basis, historical cost, prudence, materiality, offsetting and comparability. The accompanying financial statements are not intended to reflect the financial position, business performance and cash flows in accordance with accounting regimes, accounting standards or accounting principles and practices generally accepted in countries other than Vietnam.

## **2. Principles of recording cash and cash equivalents**

Cash and cash equivalents include: Cash, bank deposits, cash in transit and short-term investments of no more than 03 months that can be easily converted into cash and have little risk of conversion into cash from the date of purchase of that investment at the reporting time.

## **3. Principles of recording exchange rate differences**

Economic transactions arising in foreign currencies are converted into VND at the actual exchange rate of the transaction bank at the time of the transaction. All exchange rate differences arising during the period of production and business activities, including basic construction investment activities, are immediately recorded in financial expenses or financial revenue in the period.

Exchange rate differences due to revaluation of year-end balances of cash and cash equivalents, payables, receivables denominated in foreign currencies at the time of preparing financial statements

## **4. Principles of inventory recognition**

### **4.1 Principles of inventory valuation**

Inventories are calculated at original cost. In case the net realizable value is lower than the original price, it must be calculated at the net realizable value, the original price of inventories includes purchase costs,

processing costs and other directly related costs incurred to have the inventories in the current location and condition.

The original cost of purchased inventory includes the purchase price, non-refundable taxes, transportation, loading and unloading, storage costs during the purchase process and costs directly related to the purchase of inventory

#### **4.2 Method of determining inventory value**

Inventory value is determined by the specific identification method

#### **4.3 Method of accounting for inventory**

The company applies the regular declaration method to account for inventory

#### **4.4 Establishing inventory price reduction provisions**

The inventory price reduction provision is established at the end of the year as the difference between the original price of the inventory greater than their net realizable value. The method of establishing inventory price reduction provisions is to establish according to the difference between the amount of provisions to be established this year and the amount of provisions established in the previous year that have not been fully used, leading to the need to establish more or reverse this year.

### **5. Principles for recording trade receivables and other receivables:**

#### **5.1 Principles for recording:**

Customer receivables, prepayments to sellers, internal receivables, receivables according to construction contract progress (if any) and other receivables at the reporting time, if:

- Have a collection or payment period of less than 1 year are classified as short-term assets.
- Have a collection or payment period of more than 1 year are classified as long-term assets.

#### **5.2 Establishing provisions for doubtful debts:**

Provision for doubtful debts represents the expected loss due to receivables that are likely to be unpaid by customers for receivables at the reporting time.

Provision for doubtful debts is established for each doubtful debt based on the age of the debt or the expected loss that may occur specifically as follows:

- + 30% of the value for debt overdue from 6 months to less than 1 year
- + 50% of the value for debt overdue from 1 year to less than 2 years
- + 70% of the value for debt overdue from 2 years to less than 3 years
- + 100% of the value for debt overdue from 3 years or more

For debt not overdue for payment but with the possibility of recovery: Based on the expected loss level to establish the provision.

### **6. Principles of recording and depreciation of fixed assets**

#### **6.1 Principles of recording tangible fixed assets, intangible fixed assets**

Fixed assets are recorded at original cost. During use, fixed assets are recorded at original cost, accumulated depreciation and residual value.

#### **6.2 Depreciation method of tangible fixed assets, intangible fixed assets**

Depreciation is deducted by the straight-line method. The depreciation period is consistent with Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance and is estimated as follows:

- Houses, architectural objects 10-50 years
- Machinery, equipment 03-12 years
- Means of transport 06-10 years
- Office equipment 03-08 years

## **7. Principles of recording and depreciation of investment real estate:**

7.1 Principles of recording: Investment real estate is recorded at original cost. During the holding period for appreciation, or for operating lease, investment real estate is recorded at original cost, accumulated depreciation and residual value

7.2 Principles and methods of depreciation of investment real estate: Investment real estate is calculated and depreciated like other fixed assets of the Company.

## **8. Principles of recording financial investments**

### **8.1 Principles of recording**

Investments in subsidiaries and associates are accounted for using the cost method. Net profits distributed from subsidiaries and associates arising on the date of investment are recorded in the income statement. Other distributed amounts are deductions from the cost of investment.

Investments in joint ventures are accounted for using the cost method. Joint venture capital contributions are not adjusted for changes in the Company's ownership share in the net assets of the joint venture. The company's income statement reflects the income shared from the accumulated net profit of the joint venture company arising after the joint venture capital contribution.

Joint venture activities in the form of jointly controlled business and jointly controlled assets are applied by the company with general accounting principles as with other normal business activities. In which:

The company separately tracks the income and expenses related to the joint venture activities and allocates them to the joint venture parties according to the joint venture contract.

Short-term securities investments at the reporting date, if:

- Have a recovery period or maturity of no more than 3 months from the date of purchase of the investment are considered "cash equivalents"
- Have a capital recovery period of less than 1 year or within 1 business cycle are classified as short-term assets.
- Have a capital recovery period of more than 1 year or more than 1 business cycle are classified as long-term assets.

### **8.2 Provision for financial investments**

Provision for long-term financial investments:

Investment provision for each financial investment is equal to the invested capital and calculated according to the following formula:

$$\text{Provision level Actual contributed capital Capital Investment capital of the enterprise} \\ \text{losses of the parties} = \text{at - owner} \times \frac{\text{financial investment Actual economic organization Total actual contributed capital of the parties}}{\text{Capital Investment capital of the enterprise}}$$

Provision for securities investment depreciation:

Securities investment provision is calculated for each type of securities and calculated according to the following formula:

Provision level Number of securities Securities price Securities price  
depreciation = depreciation at the time of x accounting - actual  
securities investment reporting point on the accounting books on the market

-For listed securities:

- + Actual securities price on the Hanoi Stock Exchange (HNX) is the average trading price on the date of provisioning.
- + Actual stock price on Ho Chi Minh City Stock Exchange (HOSE) is the average trading price on the date of provisioning
- + Stock price registered for trading on the trading market of unlisted public companies (UPCOM) is the average trading price on the system on the date of provisioning.

In case the market value of the securities cannot be determined, no provision for securities depreciation is allowed.

## **9. Principles for recording trade payables and other payables**

Payables to sellers, internal payables, other payables, loans at the reporting time, if:

With a payment term of less than 1 year are classified as Current Debt.

With a payment term of more than 1 year are classified as Long-term Debt

Assets awaiting resolution are classified as Current Debt

Deferred income tax is classified as Current Debt.

## **10. Principles of recording payable expenses**

Actual expenses that have not yet arisen but are deducted in advance from production and business expenses in the period to ensure that actual expenses do not cause sudden changes in production and business expenses on the basis of ensuring the principle of matching between revenue and expenses. When such expenses arise and there is a difference with the amount deducted, the accountant will record additional or reduce the expenses corresponding to the difference.

## **11. Principles of recording owner's equity**

The owner's investment capital is recorded according to the actual capital contributed by the owner.

Excess equity is recorded according to the larger or smaller difference between the actual price incurred and the par value of the shares when issuing shares for the first time, issuing additional shares or reissuing treasury shares.

Other capital of the owner is recorded at the remaining value between the fair value of the assets that the enterprise receives from other organizations and individuals after deducting taxes payable (if any) related to these donated assets, and the additional amount from the business results. Undistributed profit after tax is the profit from the enterprise's activities after deducting adjustments due to retroactive application of changes in accounting policies and retroactive adjustment of material errors of previous years.

Principles of recording and presenting repurchased shares: Shares issued by the Company and then repurchased are the Company's treasury shares. Treasury shares are recorded at actual value and presented on the Company's Balance Sheet as a reduction in equity.

Dividend recognition principle: Dividends payable to shareholders are recorded as payable in the Company's Balance Sheet after the dividend announcement by the Company's Board of Directors.

## **12. Principles for setting aside reserves from after-tax profits:**

After being approved by the Board of Directors, after being allocated to funds according to the Company's Charter and current legal regulations, the funds will be divided among the parties based on the capital contribution ratio.

### **13. Principles and methods for recognizing revenue**

#### **13.1 Sales revenue is recognized when the following conditions are simultaneously satisfied:**

- Most of the risks and benefits associated with owning the products or goods have been transferred to the buyer:  
The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- Revenue is determined relatively reliably.
- The Company has received or will receive economic benefits from the sales transaction
- The costs related to the sales transaction can be determined.

#### **13.2 Financial revenue**

Revenue arising from interest, royalties, dividends, profits shared and other financial revenue is recorded when both of the following two conditions are satisfied:

- There is the possibility of obtaining economic benefits from that transaction.
- Revenue is determined relatively reliably
- Dividends, profits shared are recorded when the Company is entitled to receive dividends or profits from capital contributions.

### **14. Principles and methods of recording financial expenses**

Financial expenses:

Expenses recorded in financial expenses include:

Expenses or losses related to financial investment activities

Borrowing costs include interest and other costs incurred directly related to loans recorded in expenses during the period. Borrowing costs directly related to the investment in construction or production of unfinished assets are included in the value of that asset (capitalized) including interest on loans, allocation of discounts or premiums when issuing bonds, and accessory costs arising in connection with the loan procedures.

Selling costs and business management costs

### **15. Tax obligations**

Value added tax (VAT)

Enterprises apply the declaration and calculation of VAT according to the guidance of current tax laws with a VAT rate of 10% for goods that are construction machinery, a VAT rate of 10% including machinery rental, cleaning services, and other revenues.

Corporate Income Tax (CIT)

CMC Investment Joint Stock Company is a state-owned enterprise converted into a joint stock company, so it is exempted from tax for 02 years and reduced by 50% of CIT for 03 years according to Decree 187/2004/ND-CP dated November 16, 2004 of the Government

The determination of CIT is based on current tax regulations. However, these regulations change from time to time and the final determination of CIT depends on the inspection results of the competent tax authority.

### **16. Other accounting principles and methods**

Basis for preparing financial statements: Financial statements are prepared and presented based on the basic accounting principles and methods: accrual basis, going concern, original cost, appropriateness,

consistency, prudence, materiality, offset and comparability. Financial statements prepared by the Company are intended to reflect the financial situation, results of production and business activities and cash flow situation in accordance with accounting standards, accounting regimes or accounting principles and practices generally accepted in countries other than Vietnam.
