- Management, operation, repair of housing and office infrastructure;
- Cleaning services;
- Landscape decoration services;
- Trading in buying and selling of ships and technical equipment, spare parts and marine supplies.

- (For conditional industries, the enterprise only conducts business when meeting all conditions as prescribed by the law).

The Company's charter capital is: 122,444,950,000 VND (One hundred and twenty-two billion, four hundred and forty-four million, nine hundred and fifty thousand Vietnamese dong).

Par value of 10,000 VND/share equivalent to 12,244,495 shares

## **II. ACCOUNTING PERIOD, CURRENCY USED IN ACCOUNTING**

### **1. Accounting period, currency used in accounting**

The Company's annual accounting period according to the calendar year begins on January 1 and ends on December 31 of each year.

The currency used in accounting records is Vietnamese Dong (VND)

## **III. APPLIED ACCOUNTING STANDARDS AND REGIMES**

### ***Applied accounting regimes***

The Company applies the Enterprise Accounting Regimes issued under Circular No. 99/2025/TT-BTC dated October 27, 2025 of the Ministry of Finance.

### ***Statement on compliance with Accounting Standards and Accounting Regimes***

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. The Financial Statements are prepared and presented in accordance with the provisions of each standard, circular guiding the implementation of standards and the current applicable Accounting Regimes.

## **IV. OTHER POLICIES**

### **1. Financial instruments**

#### ***Initial recognition***

Financial assets

The Company's financial assets include cash and cash equivalents, trade receivables and other receivables, loans, short-term and long-term investments. At the time of initial recognition, the financial assets are determined at purchase price/issuance cost plus other costs directly related to the purchase and issuance of such financial assets.

Financial liabilities

The Company's financial liabilities include loans, trade payables and other payables, and accrued expenses. At the time of initial recognition, financial liabilities are determined at the issue price plus costs incurred directly related to the issuance of that financial liability.

#### ***Value after initial recognition***

There are currently no regulations on revaluation of financial instruments after initial recognition.

### **2. Cash and cash equivalents**

Cash includes cash in hand, non-term bank deposits, monetary gold used for value storage functions, excluding gold classified as inventories used as raw materials for the production of products or goods for sale.

Cash equivalents are short-term investments with a maturity of no more than 03 months, highly liquid, easily convertible into known amounts of cash and with low risk of conversion into cash.

### **3. Financial investments**

Trading securities are recognized in the accounting books at cost, including: Purchase price plus purchase costs (if any) such as brokerage, transaction, information provision, taxes, fees and bank fees. The cost of trading securities is determined according to the fair value of payments at the time the transaction occurs.

Investments held to maturity include: Term deposits (including treasury bills, promissory notes), bonds, preference shares that the issuer must repurchase at a certain time in the future and loans held to maturity for the purpose of earning periodic interest and other investments held to maturity.

The carrying value of investments in subsidiaries, joint ventures and associates is determined at cost.

The carrying value of investments in equity instruments of other entities that do not have control, joint control or significant influence over the investee is determined at cost if the investment is in cash or the revaluation price if the investment is in non-cash assets.

Dividends received in shares are only recognized for the number of shares received, not for the increase in the value of the investment and financial income.

Dividends received in the form of shares are recognized as an increase in financial income and an increase in the value of the investment corresponding to the amount of dividends distributed.

Exchanged shares are valued at their fair value on the exchange date. The fair value of shares of a listed company is the closing price listed on the stock market, for unlisted shares traded on UPCOM is the closing price on UPCOM, for other unlisted shares is the price agreed upon in the contract or the book value at the time of exchange.

Provisions for devaluation of investments are made at the end of the year as follows:

- For investments in trading securities: the basis for making provisions is the difference between the original price of the investments recognized in the accounting books and their market value at the time of making provisions.
- For investments in subsidiaries, joint ventures and associates and capital contributions to other entities: based on the Financial Statements of the subsidiaries, joint ventures and associates at the time of provisioning.
- For investments held for a long time (not classified as trading securities) and having no significant influence on the investee: if the investment is in listed shares or the fair value of the investment is reliably determined, the provision is based on the market value of the shares; if the fair value of the investment cannot be determined at the time of reporting, the provision is based on the Financial Statements at the time of provisioning of the investee.
- For investments held to maturity, the recoverability is assessed to establish a provision for doubtful debts according to the provisions of law.

#### **4. Receivables**

Receivables are monitored in detail according to the receivable term, receivable subject, original currency of receivable, and other factors according to the Company's management needs.

Provision for doubtful debts is set aside for the following items: overdue receivables recognized in economic contracts, loan agreements, contract commitments or debt commitments and receivables that are not due for payment but are unlikely to be recovered. In particular, the provision for overdue receivables is based on the principal repayment period according to the original sales contract, not taking into account debt extensions between the parties and receivables that are not due for payment but the debtor has gone bankrupt or is in the process of dissolution, missing or absconding.

#### **5. Inventories**

Inventories are recognized at original cost. In case the net realizable value is lower than the cost price, the inventory is recognized at the net realizable value. The cost of inventory includes the cost of purchase,

processing cost and other directly related costs incurred in bringing the inventory to its present location and condition.

The value of inventory is determined by the actual identification method.

Inventories are accounted for by the perpetual inventory method.

Method for determining the value of unfinished products: main raw material costs for each type of unfinished product.

Provision for inventory devaluation is made at the end of the period based on the difference between the original cost of inventory greater than the net realizable value.

## **6. Fixed assets, Financial lease fixed assets and Investment real estate**

Tangible fixed assets, intangible fixed assets are recognized at cost. During use, tangible fixed assets and intangible fixed assets are recognized at their original cost, accumulated depreciation and residual value. Depreciation is calculated using the straight-line method.

Fixed assets under financial leases are recognized at their original cost at their fair value or the present value of the minimum lease payment (if the fair value is higher than the present value of the minimum lease payment) plus initial direct costs related to the financial lease (excluding VAT). During use, fixed assets under financial leases are recognized at their original cost, accumulated depreciation and residual value. Depreciation of fixed assets under financial leases is calculated based on the lease term according to the contract and included in production and business expenses, ensuring adequate capital recovery.

Investment real estate is recognized at its original cost. During the operating lease period, investment real estate is recognized at its original cost, accumulated depreciation and residual value. For investment real estate held for price appreciation, depreciation is not performed.

Depreciation is deducted using the straight-line method. The depreciation period is calculated according to Circular No. 45/2013/BTC dated April 25, 2013 of the Ministry of Finance.

- Management tools and equipment	3-10 years
- Machinery and equipment	7-20 years
- Buildings and structures	5-50 years
- Other fixed assets	2-20 years
- Computer software	3-5 years
- Other intangible fixed assets	4-25 years

## **7. Prepaid expenses**

Expenses incurred related to the results of production and business activities of many accounting periods are recognized as prepaid expenses to gradually allocate to the results of business activities in the following accounting periods.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each accounting period is based on the nature and level of each type of expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated to production and business expenses using the straight-line method.

## **8. Payables**

Payables are monitored by payment term, payable subject, original currency and other factors according to the Company's management needs.

## **9. Borrowing costs**

Borrowing costs are recognized in production and business expenses in the period when incurred, except for borrowing costs directly related to investment in construction or production of unfinished assets which are included in the value of that asset (capitalized) when meeting all the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing costs". In addition, for separate loans serving the

construction of fixed assets, investment real estate, interest is capitalized even when the construction period is less than 12 months.

For general loans, including those used for the purpose of investing in the construction or production of an unfinished asset, the amount of borrowing costs eligible for capitalization in each accounting period is determined according to the capitalization rate for the weighted average cumulative costs incurred for the investment in the construction or production of that asset. The capitalization rate is calculated according to the weighted average interest rate of the outstanding loans in the period, except for separate loans serving the purpose of having an unfinished asset.

## **10. Payable expenses**

Payables for goods and services received from the seller or provided to the buyer in the reporting period but not actually paid are recognized in the production and business expenses of the reporting period.

The recognition of payable expenses in the production and business expenses in the period is carried out according to the principle of matching between revenue and expenses incurred in the period. Payable expenses will be settled with the actual expenses incurred. The difference between the provision and the actual expense is reversed.

## **11. Equity**

The equity is recognized at the actual capital contributed by the owner.

Share premium reflects the difference between the par value, direct costs related to the issuance of shares and the share issuance price (including cases of reissuance of treasury shares) and can be a positive surplus (if the issuance price is higher than the par value and direct costs related to the issuance of shares) or a negative surplus (if the issuance price is lower than the par value and direct costs related to the issuance of shares).

The option to convert bonds into shares (the capital component of convertible bonds) arises when the Company issues bonds that can be converted into a specified number of shares as specified in the issuance plan. The value of the equity component of convertible bonds is determined as the difference between the total amount of money collected from the issuance of convertible bonds minus the value of the debt component of convertible bonds.

Other capital in Equity reflects the business capital formed by supplementing the results of business operations or by being donated, presented, sponsored, or revaluation of assets (if allowed to increase or decrease the owner's investment capital).

Treasury shares are shares issued by the Company and repurchased by the Company, these shares are not canceled and will be reissued within the period prescribed by the law on securities. Treasury shares are recognized at the actual repurchase value and presented on the Balance Sheet as a reduction in Owner's Investment Capital. The cost of treasury shares when reissued or used to pay dividends, bonuses, etc. is calculated using the weighted average method.

The difference in asset revaluation is reflected in the following cases: when there is a State decision on asset revaluation, when equitizing State-owned enterprises, and other cases as prescribed by law.

Undistributed profit after tax reflects the business results (profit, loss) after corporate income tax and the situation of profit distribution or loss handling of the Company. Profit distribution is carried out when the Company has undistributed profit after tax not exceeding the undistributed profit after tax on the Financial Statement after excluding the impact of profits recognized from bargain purchase transactions. In case of paying dividends, profits to owners exceeding the undistributed profit after tax are recognized as a decrease in contributed capital. Undistributed profit after tax can be distributed to investors based on the capital contribution ratio after being approved by the General Meeting of Shareholders of the Board of Directors and after setting aside funds according to the Company's Charter and the provisions of Vietnamese law.

Dividends payable to shareholders are recognized as payables in the Company's Balance Sheet after the dividend payment notice of the Company's Board of Directors and the dividend ex-dividend date notice of the Vietnam Securities Depository Center.

## **12. Revenue**

### *Revenue from sales*

- Revenue from sales is recognized when all of the following conditions are met:
- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The company no longer retains ownership or control over the goods as the owner of the good;
- The amount of revenue can be measured reliably;
- The Company has obtained or will obtain economic benefits from the sale transaction;
- The costs related to the sale transaction can be measured reliably.

### *Revenue from financial activities*

Revenue arising from interest, royalties, dividends, profits distributed and other financial activities are recognized when all of the following two (2) conditions are met:

- It is probable that economic benefits will flow to the Company from the transaction;
- The amount of revenue can be measured reliably.

Dividends and profits distributed are recognized when the Company is entitled to receive dividends or profits from capital contributions.

Bonus shares or stock dividends: No income is recognized when the right to receive bonus shares or stock dividends is established, the number of bonus shares or stock dividends received is explained in the relevant Financial Statements.

Bonus shares or stock dividends are recognized as an increase in financial activity revenue and an increase in the value of the investment corresponding to the amount of dividends distributed.

## **13. Revenue deductions**

Deductions from sales and service revenue arising during the period include: Trade discounts, sales discounts and sales returns.

Trade discounts, sales discounts and sales returns arising in the same period of product consumption, goods and services are adjusted to reduce revenue of the period. In case products, goods and services have been consumed in previous periods, and revenue deductions arise in the following period, the revenue is recognized as a reduction according to the following principle: if they arise before the issuance of the Financial Statement, the revenue is recognized as a reduction in the Financial Statement of the reporting period (previous period), and if they arise after the issuance of the Financial Statement, the revenue of the arising period (next period) is recognized as a reduction.

## **14. Cost of goods sold**

Cost of goods sold reflects the capital value of products, goods, services, investment real estate; production cost of construction products (for construction enterprises) sold in the period, and expenses related to investment real estate business activities.

### *Cost of goods sold in the case where the Company is a real estate investor*

Cost of goods sold is recognized in accordance with the Revenue that has arisen, including the provision of expenses in advance to cost of goods sold. The provision of costs to provisionally calculate the cost of real estate, if any, must ensure the following principles:

- Pre-deduction for costs that are already included in the investment and construction estimates but do not yet have sufficient records and documents for acceptance of the volume;
- Pre-deduction of costs to provisionally calculate the cost of goods sold for the portion of real estate that has been completed and sold during the period and is eligible for revenue recognition;

- The amount of provisional costs and actual costs recognized in the cost of goods sold must be consistent with the cost price norm calculated according to the total estimated cost of the portion of real estate sold (determined by area).

### **15. Financial expenses**

Expenses recognized in financial expenses include:

- Expenses or losses related to financial investment activities;
- Borrowing expenses;
- Short-term securities transfer loss expenses, securities transaction expenses;
- Provisions for devaluation of trading securities, provisions for investment losses in other entities, losses arising from selling foreign currencies, exchange rate losses, etc.

The above amounts are recognized according to the total amount incurred during the period, without offsetting against financial activity revenue.

### **16. Corporate income tax**

#### *a) Current corporate income tax expense and deferred corporate income tax expense*

Current corporate income tax expense is determined based on taxable income in the year and corporate income tax rate in the current year.

Deferred corporate income tax expense is determined based on deductible temporary differences, taxable temporary differences and corporate income tax rate.

Current corporate income tax expense is not offset against deferred corporate income tax expense.

### **17. Related parties**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties of the Company include:

- Enterprises that directly or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with the Company, including parent companies, subsidiaries and associates;
- Individuals who directly or indirectly hold voting power of the Company that gives them significant influence over the Company, key management personnel of the Company, close family members of these individuals;
- Enterprises in which the above individuals directly or indirectly hold a significant portion of voting power or have significant influence over the enterprise.

In considering each related party relationship, attention should be paid to the substance of the relationship, not just the legal form of the relationship.

### **18. Other accounting principles and methods**

Basis for preparing the Consolidated Financial Statements: The financial statements are prepared and presented based on the basic accounting principles and methods: accrual basis, going concern, historical cost, relevance, consistency, prudence, materiality, offsetting and comparability. The financial statements prepared by the Company are not intended to reflect the financial position, business performance and cash flows in accordance with accounting standards, accounting regimes or accounting principles and practices generally accepted in countries other than Vietnam.

The Company's consolidated financial statements are prepared on the basis of consolidating the financial statements of the Parent Company and its subsidiaries. The companies are identified as subsidiaries of the Company when they have the power to control the financial and operating policies of the investee companies so as to obtain benefits from their activities.

The accounting policies of the subsidiaries may be adjusted to ensure that the accounting policies applied between the Parent Company and the subsidiaries do not differ significantly.

All transactions and significant balances between subsidiaries within the Group are eliminated in preparing the Consolidated Financial Statements.

The value of the Company's investment in associates is reflected in the Consolidated Financial Statements using the equity method. Accordingly, the investment in associates is presented in the Consolidated Balance Sheet at cost adjusted for changes in the Company's share of the net assets of the associates after the date of acquisition. Losses in the respective associates in excess of the Company's share of the equity in these companies are not recognized.
