IV. Summary of significant accounting policies:

1. Types of exchange rates applied in accounting
 - Transactions in currencies different than VND during the year are converted to VND at the actual exchange rate on the transaction date
 - Year-end balances of assets and liabilities denominated in currencies other than VND are converted to VND at the transfer buying/transfer selling rate of the commercial bank where the corporation regularly conducts transactions at the end of the accounting year
 - All exchange rate differences are recorded in a separate income statement.
2. Principle for recognizing cash and cash equivalents: This includes cash and bank deposits. Cash equivalents are highly liquid short-term investments that can be easily converted into

a specific amount of cash, have little risk of value changes, and are used to meet short-term cash payment commitments rather than for investment or other purposes.

3. Principles for investments

- a) Investments held to maturity: Recorded at cost less provision for doubtful receivables;
- b) Investments in subsidiaries, joint ventures, and associates:
 - Investments in subsidiaries and associates are initially recorded at cost, including the purchase price and directly related purchase costs. After initial recognition, these investments are determined at cost less the provision for impairment of the investment.
 - The provision for impairment of investment is established when the investee incurs losses that may lead to the parent company losing capital, unless there is evidence that the value of the investment has not deteriorated. The provision for impairment of investment is reversed when the investee subsequently generates profits to offset the previously established losses. The provision may only be reversed to the extent that the carrying value of the investment does not exceed the carrying value of the investment as assumed no provision had been recognized.

4. Receivables: Receivables are presented in the separate financial statements at the carrying amounts due from customers and other debtors, after provision for doubtful debts.

Writing off uncollectible receivables:

Unit: VND

No	Customer name	Cancellation date	Amount
1.	Can Tho Footwear Company	31/12/2019	146.141.290
2.	Cuu Long Heavy Industry JSC	31/12/2019	118.833.600
3.	Vinh Hoang Co., Ltd.	31/12/2019	479.974.413
4.	North-South Expressway Transport Company Limited	31/12/2019	559.814.300
5.	Van Phong Technical and Commercial Joint Stock Company	30/09/2022	50.804.602
6.	Quang Tam Company Limited	30/09/2022	212.780.516
7.	Phuc Toan Viet Company Limited	31/10/2023	60.000.000
8.	Hoang Dat Company Limited	30/09/2025	943.975.153
	Total:		2.572.323.874

5. Principles for inventory:

- Inventory recognition principle: Based on the lower of cost and net realizable value.

- Inventory valuation method: Cost is calculated using the first-in, first-out (FIFO) method and includes all costs incurred to bring the inventory to its current location and condition. For finished goods and work-in-process, cost includes raw materials, direct labor costs, and allocated manufacturing overheads. Net realizable value is estimated based on the selling price of the inventory minus estimated costs to complete the product and estimated costs to sell the product
 - Inventory accounting Method: Perpetual inventory;
6. Accounting and Depreciation Principles for Tangible Fixed Assets (including perennial crops for periodic production, working animals), Intangible Fixed Assets, Leased Fixed Assets, investment properties.
 - Principles for Recognizing Fixed Assets: The original cost of tangible fixed assets includes the purchase price, import duties, non-refundable purchase taxes, and directly related costs to bring the asset to its intended operational location and condition. Costs incurred after the tangible fixed asset has been put into operation, such as repair, maintenance, and overhaul costs, are recognized in a separate income statement in the year in which the costs are incurred.
 - Method of Depreciating Fixed Assets: Straight-line method.
 7. Principles of accounting for deferred expenses:
 - Deferred expenses: According to current regulations.
 - Method of expense allocation: Straight-line method.
 8. Accounting principle for accounts payable: Cost principle.
 9. Principle for recognizing accrued expenses: According to current regulations
 10. Principle for recognizing and capitalizing borrowing costs: As an expense in the year in which it is incurred
 11. Principle for recognizing equity:
 - Principle for recognizing owner's equity, capital surplus, convertible bond options, and other owner's equity: Based on actual valuation.
 - Principle for recognizing exchange rate differences: According to accounting regulations and standards.
 - Principle for recognizing undistributed profits: According to accounting regulations and standards.
 12. Principles and methods for recognizing revenue and other income: According to accounting regulations and standards.
 - Revenue: Revenue is recognized in a separate income statement when the majority of the risks and benefits associated with ownership of the product or goods are transferred to the

buyer. Revenue is not recognized if there are material uncertainties relating to the recoverability of receivables or the possibility of sales returns. Sales revenue is recognized at net amount after deducting any discounts.

- Interest income: Recognized at a rate corresponding to the time based on the principal balance of deposits and the applicable interest rate.
13. Principles and methods for recognizing current corporate income tax expense (including supplemental corporate income tax expense as stipulated by global minimum tax regulations), deferred corporate income tax expense: As prescribed by the State.
