dated December 22, 2014 of the Ministry of Finance)*

FINANCIAL STATEMENTS FOOTNOTES

Q1 2025

I. Business operations characteristics

1. Ownership form: Shares holder
2. Business field: Trading
3. Business lines:
4. Normal production and business cycle:
5. Business operations during the fiscal year that affect financial statements:
6. Company Structure:
 - List of subsidiaries: Not available
 - List of joint ventures and affiliated companies: Not available
 - List of affiliated units without legal status and dependent accounting: Not available
7. Statement on the comparability of information on the Financial Statements (whether comparable or not, if not comparable, clearly state the reasons such as change of ownership form, separation, merger, state the length of the comparison period...):

II. Accounting period, currency used in accounting

1. Annual accounting period: Based on term of the Organizational Structure will automatically take the system/option and only take the day and month; the text format will be as follows: "Starting from dd/mm to dd/mm" (Example: Accounting period: Starting from 01/01 to 31/12)

This information will not update to Financial Statement settings, by default this information on Financial Statement settings is blank, editing Financial Statement settings does not update to CCTC

2. Currency used in accounting: Vietnam Dong (VND)

III. Applicable accounting standards and regimes

1. Applicable accounting regime: The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance)
2. Statement on compliance with Accounting Standards and Accounting Regime: The Company has applied Vietnamese Accounting Standards and guiding documents the Standards issued by the State. Financial statements are prepared and presented in accordance with all provisions of each standard, circulars guiding the implementation of standards and current Accounting Regime.

IV. Accounting policies applied in case of continuously activities

1. Principles for converting Financial Statements prepared in foreign currency to Vietnam Dong (In case the accounting currency is different from Vietnam Dong); Impact (if any) due to converting Financial Statements from foreign currency to Vietnam Dong:
2. Types of exchange rates applied in accounting: Transactions in foreign currencies are converted at the exchange rate on the date of the transaction. Balances of foreign currency items at the end of the accounting period are converted at the exchange rate on this date. Exchange rate differences arising are recorded in the Income Statement.
3. Principles for determining the real interest rate (effective interest rate) used to discount cash flows:
4. Principles of recording cash and cash equivalents: Cash and cash equivalents include cash in hand, demand deposits, short-term investments, highly liquid, easily convertible to cash and subject to little risk of changes in value.
5. Accounting principles for financial investments:
 - a) Trading securities:

Trading securities are securities held for trading purposes. Trading securities are recorded in the accounting books at original cost. The cost of trading securities is determined based on the fair value of payments at the time of transaction plus costs related to the purchase of trading securities.

In subsequent accounting periods, securities investments are determined at cost minus any reduction in trading securities value.

Provision for reduction in trading securities value is made in accordance with current accounting regulations.

b) Held-to-maturity investments; Held-to-maturity investments include investments that the Company has the intention and ability to hold until maturity. Held-to-maturity investments include: term deposits (including treasury bills, promissory notes), bonds, preference shares that the issuer must repurchase at a certain time in the future and loans held to maturity for the purpose of earning periodic interest and other investments held to maturity. Held-to-maturity investments are recorded from the date of acquisition and initially measured at the purchase price and expenses related to the purchase of the investments. Interest income from investments held to maturity after the acquisition date is recognized in the Income Statement on an accrual basis. Interest earned before the Company holds is deducted from the original cost at the date of acquisition.

Held-to-maturity investments are measured at cost less allowance for doubtful debts. Allowance for doubtful debts on held-to-maturity investments is made in accordance with current accounting regulations.

c) Giving Loans: Loans are measured at cost less allowance for doubtful debts. The allowance for doubtful debts on the Company's loans is made in accordance with current accounting regulations.

d) Investment in subsidiaries; joint ventures, associates: Other investments are presented in the balance sheet at cost less any impairment allowances (if any).

đ) Investment in capital instruments of other entities:

These investments are recorded at cost, which includes purchase price and any directly attributable transaction costs. After initial recognition, these investments are measured at cost less provision for diminution in value of the investments.

e) Accounting methods for other transactions involving financial investments:

6. Accounting principles for receivables: Receivables are amounts that can be recovered from customers or other entities. Receivables are presented at book value minus provisions for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or for receivables that are unlikely to be paid by the debtor due to liquidation, bankruptcy or similar difficulties.

7. Inventory principles:

- Principle of inventory recognition: Inventories are determined on the basis of the lower of cost and net realizable value. The cost of inventories includes direct materials, direct labor and overheads, if any, that have been incurred in bringing the inventories to their present location and condition [for trading enterprises: The cost of inventories includes the cost of purchase and other costs directly attributable to the purchase of inventories]. The cost of inventories is determined by the weighted average method (or first-in, first-out or specific identification or retail method in the case of merchandise). Net realizable value is determined by the estimated selling price less the estimated costs of completion and the costs incurred in marketing, selling and distribution.

- Inventory valuation method: End-of-period average

- Inventory accounting method: Regular declaration

- Method of setting up inventory price reduction provision: The Company's inventory price reduction provision is set up in accordance with current accounting regulations. Accordingly, the Company is allowed to set up inventory price reduction provision for obsolete, damaged, substandard inventory and in case the original cost of inventory is higher than the net realizable value at the end of the accounting period.

8. Principles of recording and depreciation of fixed assets, financial leased fixed assets; investment real estate:

- Principles of recording fixed assets Tangible fixed assets are presented at original cost less accumulated depreciation.

The initial cost of tangible fixed assets comprises the purchase price and any other costs directly attributable to bringing the assets to working condition for their intended use.

- Principles of recording intangible fixed assets Land using rights: Intangible fixed assets represent the value of land use rights and are presented at original cost minus accumulated depreciation. Land use rights are allocated by the straight-line method based on the time of land use. (This section is for descriptive purposes only)

Internally Generated Intangible Assets-Research and Development Expenditures (if applicable)

Research expenses are recognized as expenses of the fiscal year (operating period) in which the expenses are actually incurred.

Intangible assets created internally by an enterprise arising from the development stage are only recognized when the following conditions are satisfied:

- Created assets are Identifiable (such as computer software and new manufacturing processes);
- It is probable that future economic benefits will flow from the asset; and
- The cost of developing the asset can be measured reliably.

Internally generated intangible assets are depreciated using the straight-line method over their estimated useful lives.

In cases where internally generated intangible assets cannot be recognized, research and development costs are recognized in profit or loss in the fiscal year (operating period) in which they are incurred.

Patents and trademarks: Patents and trademarks are recorded initially at purchase price and amortized on a straight-line

basis over their estimated useful lives.

- Principles for recording investment real estate: Investment real estate includes land using rights and factories, architectural objects held by the company for the purpose of earning profits from renting or waiting for appreciation. Investment real estate for rent is presented at cost less accumulated depreciation. Investment real estate waiting for appreciation is presented at cost less impairment. The cost of purchased investment real estate includes the purchase price and directly related costs such as legal consulting fees, registration tax and other related transaction costs. The cost of self-built investment real estate is the final settlement value of the project or directly related costs of the investment real estate. (This section is for descriptive purposes only)

Investment properties for lease are depreciated using the straight-line method over their estimated useful lives of X years.

The company does not depreciate investment real estate held for appreciation.

9. Accounting principles for business cooperation contracts: Cash and asset capital contributed to BCC are recorded as a receivable on the Interim Financial Statements. Recognition of revenue and expenses according to BCC

10. Deferred corporate income tax accounting principles:

11. Accounting principles for prepaid expenses: Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. Prepaid expenses include prepaid land rent, establishment costs and other prepaid expenses [For illustration purposes, edit to suit each enterprise].

Land rental represents the amount of land rental that has been paid in advance. Prepaid land rental is allocated to the Income Statement on a straight-line basis over the lease term. (If the Company has a Land Using Rights Certificate, this amount can be accounted for as an intangible fixed asset).

Establishment costs include costs incurred during the establishment of the Company before the date of the Investment Certificate and are assessed as having the potential to bring future economic benefits to the Company. Establishment costs are allocated to the Income Statement using the straight-line method over three years from the date the Company officially starts operating.

Other prepaid expenses include the value of tools, supplies, small components issued for use, advertising costs and training costs incurred during the period before the Company officially started operating and are considered to be able to provide future economic benefits to the Company. These costs are capitalized as prepayments and allocated to the Income Statement using the straight-line method in accordance with current accounting regulations.

12. Accounting principles for liabilities:

Payables are monitored in detail by payment terms, payable subject, original currency and other factors according to the management needs.

Payables include payables to suppliers, payables to loans, internal payables and other payables which are payables with almost certain value and time and are recorded at no lower than the payment obligation, classified as follows:

- Payables to suppliers: include payables of a commercial nature arising from transactions of purchasing goods, services, assets between the Company and sellers who are independent units of the Company
- Internal payables include payables to affiliated units without legal status and dependent accounting.
- Other payables include payables of a non-commercial nature, not related to transactions of purchasing, providing goods and services.

13. Principles for recording loans and financial lease liabilities:

Including loans, finance leases, excluding loans in the form of bonds or preferred shares with a term requiring the issuer to repurchase at a certain time in the future.

The Company monitors loans and finance leases in detail for each debt object and classifies short-term and long-term according to the repayment period.

Costs directly related to loans are recorded in financial expenses, except for costs arising from specific loans for the purpose of investment, construction or production of unfinished assets, which are capitalized according to the Accounting Standard on Borrowing Costs.

14. Principles of recognition and capitalization of borrowing costs:

15. Principle of recording payable expenses:

16. Principles and methods of recording provisions for payables: Provisions for payables are recorded when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle this obligation. Provisions are determined based on the Board of Directors' best estimate of the expenditure required to settle the obligation at the end of the reporting period.

17. Principles for recognizing unrealized revenue:

18. Principles of recording convertible bonds:

19. Principle of recognition of equity:

- Principles for recording owners' capital contributions, share premium, convertible bond options, and other owners' capital:

- Principles for recording asset revaluation differences:

- Principles for recording exchange rate differences:

- Principles for recording undistributed profits:

20. Principles and methods of revenue recognition:

- Sales revenue: Sales revenue is recognized when all five (5) following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the products or goods;

- (b) The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;

- (c) Revenue is measured with relative certainty;

- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and

- (e) Identify the costs associated with a sales transaction.

- Revenue from rendering of services: Revenue from a transaction relating to rendering of services is recognised when the outcome of the transaction can be measured reliably. In the case where a transaction relating to rendering of services is spread over several periods, revenue is recognised in the period based on the outcome of the work completed at the date of the Balance Sheet of that period. The outcome of a transaction relating to rendering of services is recognised when all four (4) of the following conditions are met:

- (a) Revenue is measured with relative certainty;

- (b) It is possible to obtain economic benefits from the transaction of providing that service;

- (c) Determine the stage of completion of the work at the Balance Sheet date; and

- (d) Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

- Financial income: Interest income is recorded on an accrual basis, determined based on the balance of deposit accounts and the applicable interest rate (if any and the interest income is considered material).

Interest from investments is recognised when the Company is entitled to receive the interest (if any and the interest from investments is considered material).

- Construction contract revenue: Revenue from the Company's construction contracts is recognized in accordance with the Company's accounting policy on construction contracts.

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured as a proportion of the estimated total contract costs incurred for work performed to date, except where this proportion is not representative of the stage of completion. This may include additional costs, compensation and performance bonuses as agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

- Other income:

21. Accounting principles for revenue deductions:

22. Principles of accounting for cost of goods sold:

23. Principles of financial cost accounting:

24. Principles of accounting for sales costs and business management costs:

25. Principles and methods of recording current corporate income tax expenses and deferred corporate income tax expenses: - Corporate income tax represents the total value of current tax payable and deferred tax.

- The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including losses carried forward, if any) and it further excludes items that are not taxable or deductible.

- Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets or liabilities in the financial statements and is recorded under the balance sheet method. Deferred income tax liabilities should be recognized for all temporary differences while deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the temporary differences can be used.

- Deferred tax is calculated at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled. Deferred tax is recognised in the income statement and is denominated in equity except when it relates to items charged or credited directly to equity.

- Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

- The determination of the Company's income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

26. Other accounting principles and methods:

V. Accounting policies applied (in case does not meet the going concern assumption)

1. Are long-term assets and long-term liabilities reclassified as current?
2. Principles for determining the value of each type of asset and liability (according to net realizable value, recoverable value, fair value, current value, current price...):
3. Financial handling principles for:
 - Provisions:
 - Difference in asset revaluation and exchange rate difference (still reflected on the Balance Sheet - if any):

VI. Additional information on the items of the Balance Sheet

01. Money Unit: VND

Items	Ending balance	Beginning balance
- Cash on hand	140.500.058	139,011,508
- Demand deposit on Banks	47.547.202	80,570,991
- Money is transferring		
Add	188.047.260	219,582,499

02. Financial investments

a) Trading securities

- Liquidation and sale of fixed assets;		
- Profit from asset revaluation;		
- Fines collected;		
- Tax reduction;		
- Other items.		39,000,000
Total		39,000,000

7. Other costs

Items	This quarter	Last quarter
- Remaining value of fixed assets and costs of liquidation and sale of fixed assets;		
- Loss due to asset revaluation;		
- Fines;		

- Other items.		68,400
Total		68,400

8. Selling expenses and business management expenses

Items	This quarter	Last quarter
a) Business management expenses incurred during the period	144.238.796	100.763.954
- Details of items accounting for 10% or more of total business management costs;		
- Other administrative expenses.	144.238.796	100.763.954
b) Selling expenses incurred during the period		8.003.933
- Details of items accounting for 10% or more of total sales costs;		
- Other selling expenses.		8.003.933
c) Amounts recorded to reduce selling expenses and business management expenses		
- Reversal of product and goods warranty provisions;		
- Reversal of restructuring provisions and other provisions;		
- Other deductions.		

9. Production and business costs by factor

Items	This quarter	Last quarter
- Cost of raw materials	49.207.166	5.756.544
- Labor costs	72.195.000	66.625.000
- Fixed asset depreciation costs	15.382.410	15.382.410
- Outsourcing service costs		46.152.000
- Other expenses in cash		851.933
Total	136.784.576	134.767.887

10. Current corporate income tax expense (Code 51)

Items	This quarter	Last quarter
- Corporate income tax expense calculated on current year taxable income		
- Adjust corporate income tax expenses of previous years into current income tax expenses of this year		
- Total current corporate income tax expense		

11. Deferred corporate income tax expense (Code 52)

Items	This quarter	Last quarter
- Deferred corporate income tax expense arising from taxable temporary differences		
- Deferred corporate income tax expense arising from the reversal of deferred income tax assets		
- Deferred corporate income tax income arising from deductible temporary differences		
- Deferred corporate income tax income arising from unused tax losses and tax incentives		
- Deferred corporate income tax income arising from the reversal of deferred income tax liabilities		
- Total deferred corporate income tax expense		

VIII. Additional information for items presented in the statement of cash flows

1. Non-cash transactions that affect the statement of cash flows and amounts of cash held by the business but not used

Items	This quarter	Last quarter
- Purchase of assets by assuming directly related liabilities or through financial leasing transactions		
- Buying businesses through issuing shares		
- Convert debt into equity
