6. Statement on the comparability of information in the Consolidated Financial Statements

The corresponding figures for the previous year's accounting period are comparable with those of the current year's accounting period.

7. Employees

As of the end of the accounting period, the Corporation has 139 employees (compared to 131 employees at the beginning of the year).

II. FISCAL YEAR AND ACCOUNTING CURRENCY

1. Fiscal year

The Corporation's fiscal year begins from January 1 to December 31 each year.

2. Accounting currency unit

The accounting currency unit is Vietnamese Dong (VND) because the receipts and payments are primaly made in VND.

III. ACCOUNTING STANDARDS AND SYSTEM

1. Accounting System

The Corporation applies Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System promulgated under Circular No. 200/2014/TT-BTC dated 22 December 2014 guiding the Enterprise Accounting System, Circular No. 202/2014/TT-BTC dated 22 December 2014 guiding the preparation and presentation of consolidated financial statements, and other Circulars guiding the implementation of accounting standards issued by the Ministry of Finance in the preparation and presentation of consolidated financial statements for the accounting period.

2. Statement of the compliance with the Accounting Standards and System

The Board of General Directors of the Parent Company ensures compliance with the requirements of Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System promulgated under Circular No. 99/2025/TT-BTC dated 27 October 2025, Circular No. 43/2026/TT-BTC dated 20 April 2026, as well as Circulars guiding the implementation of accounting standards issued by the Ministry of Finance in the preparation and presentation of consolidated financial statements.

IV. ACCOUNTING POLICIES

1. Accounting convention

The Consolidated Financial Statements are prepared on the accrual basis (except for the information related to cash flows).

2. Consolidation bases

The consolidated financial statements for the accounting period comprise the financial statements of the Parent Company and its subsidiaries. A subsidiary is an entity controlled by the Parent Company. Control exists when the Parent Company has the power, directly or indirectly, to govern the financial and operating policies of a subsidiary so as to obtain economic benefits from its activities. In assessing

control, potential voting rights arising from call options or debt and equity instruments that are convertible into ordinary shares as at the end of the accounting period are taken into account.

The results of operations of subsidiaries acquired or disposed of during the period are included in the consolidated income statement for the accounting period from the date of acquisition or up to the date of disposal of the investment in such subsidiary.

The financial statements of the Parent Company and subsidiaries used for consolidation are prepared for the same accounting period and apply uniform accounting policies for like transactions and events in similar circumstances. Where the accounting policies of a subsidiary differ from those uniformly applied across the Corporation, appropriate adjustments are made to the financial statements of that subsidiary before being used for the preparation of the consolidated financial statements for the accounting period.

Balances of balance sheet accounts between Corporation companies, intercompany transactions, and unrealized internal profits arising from these transactions are eliminated in full. Unrealized losses arising from intercompany transactions are also eliminated unless the costs giving rise to the loss cannot be recovered.

Non-controlling interests represent the portion of profit or loss and net assets of a subsidiary not held by the Corporation and are presented separately in the consolidated income statement and in the consolidated balance sheet (within equity). Non-controlling interests comprise the value of non-controlling interests as at the initial business combination date and the non-controlling interests' share of movements in equity since the date of business combination. Losses applicable to non-controlling interests in a subsidiary are allocated to the non-controlling interests even if such losses exceed the non-controlling interests' ownership in the net assets of the subsidiary.

3. Cash and cash equivalents

Cash includes cash on hand and demand deposits in banks. Cash equivalents are short-term investments of which the due dates cannot exceed 3 months from the dates of the investments and the convertibility into cash is easy, and which do not have a lot of risks in the conversion into cash as of the balance sheet date.

4. Financial investments

Trading Securities

Investments are classified as trading securities when held for the purpose of trading for profit.
Trading securities are recorded at historical cost. The cost of trading securities is determined by the fair value of the consideration paid at the transaction date plus any costs directly attributable to the acquisition of the trading securities.

The recognition date of trading securities is the date the Company obtains ownership, specifically as follows:

- For listed securities: recognized at the order matching date (T+0).
- For unlisted securities: recognized at the date of official ownership as prescribed by law.

Interest, dividends and profits of the periods prior to the purchase of trading securities are recorded as a decrease in value of those securities. Interest, dividends and profits of the periods after the purchase of trading securities are recognized as revenue. The dividends paid in form of shares are not recorded as an increase in values, but the increasing quantity is followed up.

Provisions for devaluation of trading securities is made for each type of security bought and sold on the market and whose fair value is lower than its cost. The fair value of trading securities listed on the stock market or traded on UPCOM is the closing price at the end of balance sheet date. If the stock market or UPCOM is not trading at the end of balance sheet date, the fair value of the securities is the closing price of the last trading session immediately preceding the end of balance sheet date.

Increases or decreases in the provisions for devaluation of trading securities that need to be recorded at the end of balance sheet date are recognized in finance expenses.

Profit or loss from the transfer of trading securities is recognized in financial income or finance expenses. Cost is determined using the moving weighted-average method.

Held-to-maturity investments
An investment is classified as held-to-maturity when the Corporation has the positive intention and ability to hold it until maturity. Held-to-maturity investments comprise only term bank deposits.

Held-to-maturity investments are initially recognized at cost. After initial recognition, these investments are stated at recoverable amount. Interest income from held-to-maturity investments acquired after the acquisition date is recognized in the income statement on an accrual basis. Interest earned prior to the acquisition by the Corporation is deducted from the cost of acquisition.

When there is firm evidence showing that part or all of an investment may not be recoverable and the loss amount can be reliably estimated, such loss is recognized in financial expenses during the period and directly deducted from the carrying value of the investment.

Loans
Loans are stated at cost less provision for doubtful debts. Provision for doubtful debts of loans is made based on estimated potential losses that may occur.

Investments in associates
An associate is an entity in which the Corporation has significant influence but not control over the financial and operating policies. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but not control over those policies.

Investments in associates are accounted for using the equity method. Accordingly, an investment in an associate is carried in the consolidated financial statements for the accounting period at initial cost plus post-acquisition changes in the Corporation's share of net assets of the associate. If the Corporation's share of losses of an associate equals or exceeds the carrying amount of the investment, the carrying amount of the investment presented in the consolidated financial statements for the accounting period is reduced to zero, unless the Corporation has incurred obligations to make payments on behalf of the associate.

The financial statements of associates are prepared for the same accounting period as the consolidated financial statements of the Corporation. Where the accounting policy of an associate differs from those uniformly applied across the Corporation, appropriate adjustments are made to the financial statements of that associate before being used for the preparation of the consolidated financial statements for the accounting period.

Unrealized profits and losses arising from transactions with associates are eliminated to the extent of the Corporation's interest when preparing the consolidated financial statements for the accounting period.

5. Receivables

Receivables are recognized at the carrying amounts less allowances for doubtful debts.

The classification of receivables as trade receivables and other receivables is made according the following principles:

- Trade receivables reflect receivables concerning the commercial nature arising from purchase and sale transactions between the Corporation and customers who are independent to the Corporation.
- Other receivables reflect receivables not concerning the commercial nature and irrelevant to purchase and sale transactions.

Allowance is made for each doubtful debt on the basis of the estimated loss.

Increases/decreases in the obligatory allowance for doubtful debts as of the end of the quarter are recorded into general and administration expenses.

6. Inventories

Inventories are recognized at the lower of cost and net realizable value.

The cost of inventories is the merchandise determined to comprise costs of purchases and other directly relevant costs incurred in bringing the inventories to their present location and conditions.

The cost of goods issued are determined in accordance with the weighted average method and recorded in line with the perpetual method.

Net realizable value is the estimated selling price of inventories in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Allowance for inventories is recognized for each type of inventory when their costs are higher than their net realizable values. Increases/(decreases) in the obligatory allowance for inventories as of the balance sheet date are recorded into cost of goods sold.

7. Prepaid expenses

Prepaid expenses comprise actual expenses incurred and relevant to financial performance in several accounting periods. The prepaid expenses of the Corporation primarily include costs of tools and equipment, costs for the installation of information technology systems, and costs for the renovation and relocation of offices. These prepaid expenses are allocated over the prepaid period or the duration of the corresponding economic benefits generated from these costs.

Expenses of tools

Expenses of tools being put into use are allocated into expenses in accordance with the straight-line method for the maximum period of 03 years.

Installation costs of information technology systems

The installation costs of information technology systems are allocated to expenses using the straight-line method for the maximum period of 03 years.

Office renovation and relocation costs

The costs for renovation and relocation of offices are also allocated to expenses using the straight-line method for the maximum period of 03 years.

8. Operating leased assets

A lease is classified as an operating lease if it transfers substantially all the risks and rewards incident to ownership belonging to the lessor. The lease expenses are allocated in the Company's operation costs in accordance with the straight-line method over the lease term and do not depend on the method of lease payment.

9. Tangible fixed assets

Tangible fixed assets are determined by their historical costs less accumulated depreciation. Historical costs of tangible fixed assets include all the expenses paid by the Company to bring the asset to its working condition for its intended use. Other expenses arising subsequent to initial recognition are included into historical costs of fixed assets only if it can be clearly demonstrated that the expenditure has resulted in future economic benefits expected to be obtained from the use of these assets. Those which do not meet the above conditions will be recorded into operation costs during the period.

When a tangible fixed asset is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain or loss arising from such disposal is included in the income or the expenses during the period.

Tài Tangible fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years applied are as follows:

Fixed assets	Years
Buildings and Structures	18 – 25
Machinery and equipment	03 – 08
Vehicles	10
Office equipment	03 – 08
Other fixed assets	03 – 08

10. Intangible fixed assets

Intangible fixed assets are determined by their initial costs less accumulated amortization.

Initial costs of intangible fixed assets include all the costs paid by the Company to bring the asset to its working condition for its intended use. Other costs relevant to intangible fixed assets arising subsequent to initial recognition are included into operation costs during the period only if these costs are associated with a specific intangible fixed asset and result in future economic benefits expected to be obtained from the use of these assets.

When an intangible fixed asset is sold or disposed, its Initial costs and accumulated amortization are written off, then any gain or loss arising from such disposal is included in the income or the expenses during the period.

The Company's intangible fixed assets include:

Computer software

The Company's intangible fixed asset is Computer software. Expenses attributable to computer software, which is not a part associated with the relevant hardware, will be capitalized. Costs of

computer software include all the expenses paid by the Company until the date the software is put into use. Computer software is amortized in accordance with the straight-line method within 3 years.

Company Website

The initial cost of the Company website includes all the costs paid by the Corporation to bring the website to its working condition for its intended use. The Company website is amortized in accordance with the straight-line method within 3 years.

11. Investment properties

Investment property refers to land use rights, buildings, parts of buildings, or infrastructure owned by the Corporation, which are held for the purpose of earning rental income. Investment properties for lease are measured at their historical costs less accumulated depreciation. Historical cost includes all the expenses paid by the Corporation or the fair value of other considerations given to acquire the assets up to the date of its acquisition or construction.

Expenses related to investment property arising subsequent to initial recognition should be added to the historical cost of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Company.

When the investment property is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain or loss arising from such disposals is included in the income or the expenses during the period.

The transfer from owner-occupied property or inventories into investment property shall be made when, and only when, there is a change in use evidenced by the end of owner-occupation and the commencement of an operating lease to another party or the end of construction. The transfer from investment property to owner-occupied property or inventories shall be made when, and only when, there is a change in use evidenced by the commencement of owner-occupation or the commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the historical cost or net book value of investment property at the date of transfer.

Investment property for lease is depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation year for investment property is as follows:

Fixed assets	Years
Land use right	39
Building	25 - 30

12. Construction-in-progress

Construction-in-progress reflects the expenses (including relevant interest expenses following the accounting policies of the Corporation) directly attributable to assets under construction, machinery and equipment under installation for purposes of production, leasing and management as well as the repair of fixed assets in progress. These assets are recorded at historical costs and not depreciated.

13. Business combination and goodwill

The business combination is accounted by applying acquisition method. The costs of business combination include the fair values as at the acquisition date of the exchanged assets, the incurred or assumed liabilities as well as the equity instruments issued by the Corporation in exchange for control of the acquiree, plus any cost directly attributable to the business combination. The acquired assets,

the identifiable and contingent liabilities assumed from the business combination are recognized at their fair values as at the acquisition date.

If the business combination covers some accounting periods, the cost of business combination equals the total investment made at the date of obtaining the control of subsidiaries plus the amount of previous investments which are re-evaluated at fair value as at the date of obtaining the control of subsidiaries. The difference between the re-evaluated amount and the cost of investment shall be recorded in the financial performance provided that the Corporation does not have any significant influence on subsidiaries prior the date of obtaining the control and the investment in subsidiaries is presented in line with the cost method. In case where the Corporation has significant influence on the subsidiaries prior the date of obtaining the control, the investment in subsidiaries is presented in line with the equity method, the difference between the re-evaluated amount and the cost of investment determined in line with the equity method shall be recorded in the financial performance; and the difference between the investment determined in line with the equity method and the cost of investment shall be directly recorded in "Retained earnings" of the Consolidated Statement of Financial Position for the accounting period.

The excess of the cost of business combination over the ownership share of the Corporation in the net fair value of the assets, the identifiable and contingent liabilities of acquiree which are recognized at the date of obtaining the control of subsidiaries is recognized as goodwill. If the ownership share of the Corporation in the net fair value of the assets, the identifiable and contingent liabilities of acquiree which are recognized at the date of obtaining the control of subsidiaries exceeds the cost of business combination, the difference will be included in the financial performanc.

The benefit of non-controlling shareholders as at the date of business combination is initially measured on the basis of the ownership share of non-controlling shareholders in the fair values of the assets, the liabilities and the contingent liabilities recognized.

14. Payables and accrued expenses

Payables and accrued expenses are recorded for the amounts payable in the future associated with the goods and services received. Accrued expenses are recorded based on reasonable estimates for the amounts payable.

The classification of payables as trade payables, accrued expenses and other payables is made on the basis of following principles:

- Trade payables reflect payables of commercial nature arising from the purchase of goods, services, or assets and the seller, of which the seller is an independent entity with the Corporatio.
- Accrued expenses reflect expenses for goods, services received from suppliers or supplied to customers but have not been paid, invoiced or lack of accounting records and supporting documents; pay on leave payable to employees; and accrual of operation expenses.
- Other payables reflect payables of non-commercial nature and irrelevant to purchase, sales of goods or provisions of services.

The payables and accrued expenses are classified as short-term and long-term items in the Consolidated Statement of Financial Position for the accounting period on the basis of their remaining term as of the end of the accounting period.

15. Owner's equity

Capital is recorded according to the actual amounts invested by shareholders of the Parent Company.

16. Profit distribution

Profit after tax is distributed to the shareholders after appropriation for funds under the Parent Company's Charter as well as legal regulations and approved by the General Meeting of Shareholders.

The distribution of profits to the shareholders is made with consideration toward non-cash items in the retained earnings that may affect cash flows and payment of profit such as profit due to revaluation of assets contributed as investment capital, profit due to revaluation of monetary items, financial instruments and other non-cash items.

Dividends are recorded as payables upon approval of the General Meeting of Shareholders.

17. Recognition of revenue and income

Revenue from sales of merchandise

Revenue from merchandises shall be recognized when all of the following conditions are satisfied:

- The Corporation transfers most of risks and benefits incident to the ownership of goods or products to customers.
- The Corporation retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the merchandise, products sold.
- The amount of revenue can be measured reliably. When the contracts stipulate that buyers have the right to return goods, products purchased under specific conditions, revenue is recorded only when those specific conditions are no longer exist and buyers retain no right to return goods, products (except for the case that such returns are in exchange for other merchandise or services).
- The Corporation received or shall probably receive the economic benefits associated with sale transactions.
- The cost incurred or to be incurred in respect of the sale transaction can be measured reliably.

Revenue from service provision

Revenue from service provision shall be recognized when all of the following conditions are satisfied:

- The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the services provided under specific conditions, revenue is recognized only when these specific conditions are no longer existed and the buyer is not entitled to return the services provided.
- The Company received or shall probably receive the economic benefits associated with the provision of services.
- The stage of completion of the transaction at the end of reporting period can be measured reliably.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

In the case that the services are provided in several accounting periods, the determination of sales is done on the basis of the volume of work done as of the balance sheet date.

Revenue from leasing operating assets

Revenue from leasing operating assets is recognized in accordance with the straight-line method during the lease term. Rentals received in advance for several periods are allocated to revenue in consistence with the lease term.

Interest

Interest is recorded, based on the term and the actual interest rate applied in each particular period.

Dividends and profit shared

Dividends and profit shared are recognized when the Company has the right to receive dividends or profit from the capital contribution. The dividends paid in form of shares are not recorded as an increase in values, but the increasing quantity is followed up.

18. Expenses

Expenses are those that result in outflows of the economic benefits and are recorded at the time of transactions or when incurrence of the transaction is reliable regardless of whether payment for expenses is made or not.

Expenses and their corresponding revenues are simultaneously recognized in accordance with matching principle. In the event that matching principle conflicts with prudence principle, expenses are recognized based on the nature and regulations of accounting standards in order to guarantee that transactions can be fairly and truly reflected.

19. Corporate income tax

Corporate income tax includes current income tax and deferred income tax.

Current income tax

Current income tax is the tax amount computed based on the taxable income. Taxable income is different from accounting profit due to the adjustments of temporary differences between tax and accounting figures, non-deductible expenses as well as those of non-taxable income and losses brought forward.

Deferred income tax

Deferred income tax is the amount of corporate income tax payable or refundable due to temporary differences between book values of assets and liabilities serving the preparation of the Financial Statements and the values for tax purposes. Deferred income tax liabilities are recognized for all the temporary taxable differences. Deferred income tax assets are recorded only when there is an assurance on the availability of taxable income in the future against which the temporarily deductible differences can be used.

Carrying values of deferred corporate income tax assets are considered as of the balance sheet date and will be reduced to the rate that ensures enough taxable income against which the benefits from part of or all of the deferred income tax can be used. Deferred corporate income tax assets, which have not been recorded before, are considered as of the balance sheet date and are recorded when there is certainly enough taxable income to use these unrecognized deferred corporate income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined at the estimated tax rate to be applied in the year when the assets are recovered or the liabilities are settled based on the effective tax rates at the end of the fiscal year. Deferred income tax is recognized in the Income Statement. In the case that deferred income tax is related to the items of the owner's equity, corporate income tax will be included in the owner's equity.

The Company shall offset deferred tax assets and deferred tax liabilities if:

- The Corporation has the legal right to offset current income tax assets against current income tax liabilities; and
- Deferred income tax assets and deferred income tax liabilities are relevant to corporate income tax which is under the management of one tax authority either:
  - Of the same subject to corporate income tax; or

- The Corporation has intention to pay current income tax liabilities and current income tax assets on a net basis or recover tax assets and settle tax liability simultaneously in each future period to the extent that the majority of deferred income tax liabilities or deferred income tax assets are paid or recovered.

20. Related parties

A party is considered a related party of the Company in case that party is able to control the other party or to cause material effects on the financial decisions as well as the operations of the other party. A party is also considered a related party of the Company in case that party is under the same control or is subject to the same material effects.

Considering the relationship of related parties, the nature of relationship is focused more than its legal form.
